# About the course Selenium locators step by step

### Course Presenter : SDET QA

Unlock the full potential of your programming skills with the Selenium Locators Step by Step online course. Designed for aspiring automation testers and developers in the Middle East, this training course provides comprehensive instruction on mastering Selenium locators, a fundamental component of effective web automation. By completing this certified course, you will gain valuable skills that enhance your professional profile and open doors to new career growth opportunities. Throughout this course, you will learn how to identify and utilize various Selenium locators to automate web applications efficiently. The course emphasizes practical, real-world applications, enabling you to develop reliable automation scripts that improve testing accuracy and speed. This training course is ideal for those seeking to deepen their understanding of programming and automation testing within the fast-evolving tech landscape of Saudi Arabia, UAE, and the broader Middle East. What you will learn: - Fundamentals of Selenium WebDriver and automation testing - Different types of Selenium locators including ID, Name, Class, Tag, Link Text, Partial Link Text, CSS Selector, and XPath - Best practices for selecting and implementing locators for robust test scripts - Strategies for troubleshooting locator issues and optimizing automation workflows - Techniques to improve testing efficiency and reduce maintenance efforts Who this course is for: - Aspiring automation testers and QA professionals - Software developers interested in automation testing - IT professionals seeking to enhance their programming and testing skills - Individuals aiming for certification in automation testing to advance their careers Why choose this course on our platform: - Expert-led training with a focus on practical skills and real-world scenarios - Access to comprehensive learning materials and interactive exercises - Certification upon completion to validate your expertise - Designed to fit your schedule with flexible online learning options - Trusted platform with a strong reputation for quality technical education in the Middle East Career opportunities: Completing this course positions you for roles such as Automation Tester, QA Engineer, Software Developer in Test, and Test Automation Specialist. It provides solid foundational knowledge to excel in the growing automation testing industry across Saudi Arabia, UAE, and the wider Middle East. Certificate: Upon finishing the course successfully, you will receive a Certified Selenium Locators Specialist certificate. This accreditation enhances your resume, demonstrates your commitment to professional development, and supports your career growth in the competitive programming and testing fields. SDET QA

**Programming Category's Courses**

# Course Lesson(4)

Lesson 1 :
**Selenium Locators Part 1 ID Name Link Text Partial Link Test Tag Name Class CSS Selector**

Lesson 2 : **Selenium Locators Part 2 XPath Locator XPath Functions Operators**

Lesson 3 : **Selenium Locators Part 3 Advanced X Path with Axes Methods**

Lesson 4 : **Selenium Locators Part 4 Locating Elements in Shadow DOM**
