About the course Protractor for beginners step by step

Course Presenter : SDET QA

Discover the fundamentals of Protractor with this comprehensive online training course designed for beginners in computer science. Whether you are starting your journey in automation testing or seeking to enhance your professional skills, this course provides a structured path to mastering Protractor, a vital tool for testing Angular applications. Gain practical knowledge and hands-on experience to improve your testing efficiency and quality, helping you stand out in the competitive tech industry. In this course, you will learn: - The core concepts of Protractor and its role in automated testing - How to set up and configure Protractor for various testing environments - Writing and executing effective test scripts for Angular applications - Using Protractorâ€™s features to identify and troubleshoot issues - Best practices for maintaining scalable and reliable test suites - Integrating Protractor with other testing frameworks and tools for comprehensive testing solutions This training course is ideal for aspiring software testers, QA professionals, and computer science students eager to expand their skill set. If you are looking to build a solid foundation in automation testing or advance your career in the Middle East, particularly in Saudi Arabia and the UAE, this course is tailored for you. Why choose this course on our platform? We offer industry-relevant content developed by experts, flexible online learning options, and a certified course that enhances your professional profile. Our focus is on providing practical skills that directly translate into career growth and job opportunities in the dynamic tech landscape. Upon completion, you will receive a respected certificate, validating your proficiency in Protractor and automation testing. This certification can significantly boost your employability and open doors to new roles in software development and quality assurance. Join this professional training course today and take a strategic step toward advancing your career in computer science and automation testing. Develop the skills needed for tomorrowâ€™s technology challenges and become a certified professional in Protractor testing. SDET QA

Computer Science Category's Courses

Course Lesson(20)

Lesson 1 : **Part 1 Introduction To Protractor**

Lesson 2 : **Part 2 How To Install Protractor on Windows**

Lesson 3 : **Part 3 How To Install Protractor on Mac**

Lesson 4 : **Part 4 How To Setup Protractor Project in Visual Studio Code**

Lesson 5 : **Part 5 First Test Case in Protractor**

Lesson 6 : **Part 6 Locators in Protractor**

Lesson 7 : **Part 7 Jasmine Framework for Protractor Jasmine Test Building Blocks**

Lesson 8 : **Part 8 Jasmine Framework for Protractor Jasmine Test Building Blocks**

Lesson 9 : **Part 9 Jasmine Framework for Protractor Expect with Matchers**

Lesson 10 : **Part 10 How to Create a Test Case in Protractor for AngularJS Application**

Lesson 11 :
Part 11 Working with Elements in AngularJS App using Protractor Input box Buttons Alert Drop Down

Lesson 12 : **Part 12 Working with Elements in AngularJS App using Protractor Table**

Lesson 13 : **Part 13 How To Automate Non Angular JS Applications in Protractor**

Lesson 14 : **Part 14 How To Handle Frames Iframes in Protractor**

Lesson 15 : **Part 15 How To Handle Mouse Actions in Protractor Mouse Hover**

Lesson 16 : **Part 16 How To Handle Mouse Actions in Protractor Double Click**

Lesson 17 : **Part 17 How To Handle Mouse Actions in Protractor Right Click or Context Click**

Lesson 18 : **Part 18 How To Handle Mouse Actions in Protractor Drag and Drop**

Lesson 19 : **Part 19 Page Object Model POM in Protractor**

Lesson 20 :
Part 20 HTML Report with Screenshots in Protractor protractor beautiful reporter package
