# About the course Selenium with Python behave step by step

### Course Presenter : SDET QA

Enhance your expertise in automated testing with our comprehensive online course, Selenium with Python Behave Step by Step. Designed for aspiring software testers and quality assurance professionals in the Middle East and globally, this training course offers a structured approach to mastering Selenium automation framework combined with Python and Behave. Gain practical skills that boost your career growth and open new opportunities in the competitive field of computer science. Throughout this course, you will learn how to develop, implement, and manage automated test scripts efficiently. Our step-by-step curriculum ensures you understand core concepts and advanced techniques, empowering you to deliver high-quality testing solutions. You will explore: - The fundamentals of Selenium WebDriver and Python integration - Writing effective BDD (Behavior-Driven Development) test cases using Behave - Automating web application testing processes - Best practices for test script maintenance and debugging - Strategies to optimize testing workflows for faster delivery - Techniques for reporting and analyzing test results effectively This course is ideal for software developers, QA engineers, and IT professionals who want to strengthen their professional skills and stay ahead in the rapidly evolving field of computer science. Whether you are looking to start a new career, improve your testing capabilities, or attain a recognized certification, this course provides the essential knowledge and practical experience needed. Choosing this training course on our platform guarantees access to expert instructors, comprehensive learning materials, and real-world projects that simulate industry scenarios. Our user-friendly online format allows you to learn at your own pace, making it perfect for busy professionals in Saudi Arabia, the UAE, and the broader Middle East region. Successful completion of this course awards you a certified course certificate, validating your skills in Selenium automation with Python and Behave. This certification enhances your professional profile, increases your employability, and supports your career development in the competitive technology landscape. Enroll today to advance your skills in computer science and achieve your career goals with a trusted, industry-recognized training course. SDET QA

**Computer Science Category's Courses**

# Course Lesson(7)

Lesson 1 : **Part 1 Selenium with Python Behave BDD Introduction**

Lesson 2 : **Part 2 Selenium with Python Behave BDD Environment Setup**

Lesson 3 : **Part 3 Selenium with Python Behave BDD Project Creation Feature File Steps**

Lesson 4 : **Part 4 Selenium with Python Behave BDD Step Parameters**

Lesson 5 : **Part 5 Selenium with Python Behave BDD Scenario Outline Examples Data Driven Test**

Lesson 6 : **Part 6 Selenium with Python Behave BDD Background**

Lesson 7 : **Part 7 Selenium with Python Behave BDD Allure Reports**
