About the course Selenium Java cucumber BDD Framework

Course Presenter : SDET QA

Unlock the power of automation testing with our comprehensive Selenium Java Cucumber BDD Framework online course. Designed for aspiring software testers and developers in the Middle East, this professional training course offers valuable insights into building reliable, scalable, and maintainable test automation frameworks. Gain the skills necessary to excel in the competitive field of computer science and enhance your career growth through industry-recognized certification. In this course, you will learn how to develop robust automation frameworks using Selenium WebDriver with Java, implement Behavior-Driven Development (BDD) with Cucumber, and adopt best practices for test automation. Practical, hands-on training ensures you can apply these skills directly to real-world projects, making you a valuable asset in software quality assurance and development teams. What you will learn: - Fundamentals of Selenium WebDriver with Java for test automation - Building and maintaining BDD frameworks using Cucumber - Writing effective test scenarios and features in Gherkin language - Integrating Selenium with Cucumber for seamless automation workflows - Best practices for test data management and reporting - Debugging and troubleshooting automation scripts - Strategies for continuous integration and delivery in testing This course is ideal for software testers, QA engineers, developers, and IT professionals in Saudi Arabia, UAE, and across the Middle East seeking to build professional skills in automation testing. Whether you're looking to start a new career or advance your current position, this training course provides the practical knowledge and certification to elevate your expertise. Choosing this course on our platform ensures access to expert instructors, comprehensive curriculum, and industry-recognized certification upon completion. Our program is designed to enhance your learning experience and support your career development in the dynamic field of computer science and software testing. Upon completing this certified course, you'll be equipped to pursue roles such as Automation Tester, QA Engineer, or Software Developer, with a competitive edge in the job market. Expand your professional portfolio and unlock new career opportunities with this essential training course in test automation frameworks. SDET QA

Computer Science Category's Courses

Course Lesson(5)

Lesson 1 : **Part 1 Selenium with Java Cucumber BDD Framework Development from Scratch**

Lesson 2 : **Part 2 Selenium with Java Cucumber BDD Framework Development from Scratch**

Lesson 3 : **Part 3 Selenium with Java Cucumber BDD Framework Development from Scratch**

Lesson 4 : **Selenium with Java using Cucumber Demo Setup Cucumber in Eclipse IntelliJ IDE**

Lesson 5 : **Part 4 Selenium with Java Cucumber BDD Framework Development from Scratch**
