About the course Big data testing using hadoop step by step

Course Presenter : SDET QA

This comprehensive online course, Big Data Testing Using Hadoop Step by Step, offers a focused pathway for professionals seeking to enhance their expertise in Computer Science and Big Data technologies. Designed to provide practical skills and in-depth knowledge, this training course equips learners with the essential tools to perform effective testing on large-scale data systems using Hadoop. Whether you are aiming to boost your career growth or gain a competitive edge in the tech industry, this certified course is your gateway to mastering Big Data testing techniques. Throughout this training course, you will learn how to set up Hadoop environments, implement data validation and testing strategies, and troubleshoot common issues in big data projects. The course covers key topics such as data integrity, performance testing, and automation processes vital for ensuring the reliability of big data applications. By the end of this program, you'll be able to confidently execute comprehensive testing procedures that meet industry standards. This course is ideal for IT professionals, software testers, data engineers, and anyone interested in expanding their skill set in the rapidly growing field of Big Data. It is particularly suitable for those in the Middle East, including Saudi Arabia and UAE, who want to develop professional skills aligned with regional and global data management trends. Choosing this course on our platform ensures access to expert instructors, up-to-date content, and a flexible learning schedule. Our platform is trusted by thousands of learners committed to advancing their careers in Computer Science and Big Data analytics. Upon successful completion, participants will receive a recognized certificate that validates their expertise in Hadoop-based big data testing. This certification serves as a valuable addition to your professional profile and opens doors to new career opportunities in data analytics, quality assurance, and technology consulting. Enroll today to elevate your skills, gain industry certification, and accelerate your career growth in the competitive world of Big Data and Computer Science. SDET QA

Computer Science Category's Courses

Course Lesson(29)

Lesson 1 : **Big Data Testing Session 1**

Lesson 2 : **Big Data Testing Session 2**

Lesson 3 : **Big Data Testing Session 3**

Lesson 4 : **Big Data Testing Session 4**

Lesson 5 : **Big Data Testing Session 5**

Lesson 6 : **Data warehouse ETL Big Data Concepts**

Lesson 7 : **How to Test Java MapReduce Jobs in Hadoop**

Lesson 8 : **How to Test Python MapReduce Jobs**

Lesson 9 : **Hadoop HDFS Commands**

Lesson 10 : **Apache Hive External Tables**

Lesson 11 : **Apache Hive Complex Data Types Collections**

Lesson 12 : **Hive Partitioning and Bucketing**

Lesson 13 : **Apache Hive Built in Functions**

Lesson 14 : **Hive Aggregation Functions**

Lesson 15 : **Hive User Defined Functions**

Lesson 16 : **Overview on Apache SQOOP**

Lesson 17 : **Sqoop Jobs**

Lesson 18 : **Sqoop Commands**

Lesson 19 : **Import data from MySQL to HDFS using Sqoop**

Lesson 20 : **Apache Pig Overview**

Lesson 21 : **Apache Pig Transformations**

Lesson 22 : **Pig Grouping and Joining**

Lesson 23 : **Apache Pig Built in functions**

Lesson 24 : **Pig User Defined Functions**

Lesson 25 : **Overview on Apache Flume How to do Streaming**

Lesson 26 : **ETL Big Data Testing with QuerySurge**

Lesson 27 : **Big Data Hadoop Testing Demo**

Lesson 28 : **Big Data Hadoop Testing Concepts**

Lesson 29 : **Big Data Testing Test Process Test Levels Test Cases**
