About the course Testing in selenium with Java from scratch

Course Presenter : SDET QA

Enhance your programming skills and accelerate your career growth with our comprehensive online training course, Testing in Selenium with Java from Scratch. Designed for aspiring QA professionals and developers in the Middle East and beyond, this course offers a practical and in-depth approach to mastering automated testing using Selenium WebDriver and Java. Whether you're starting your journey in software testing or seeking to upgrade your professional skills, this certified course provides the essential knowledge to succeed in the competitive tech industry. Throughout this online course, you will learn to develop and execute automated test scripts efficiently. The program covers fundamental concepts and advanced techniques, ensuring you gain a thorough understanding of Selenium testing frameworks. By the end of the training, you'll be equipped to implement automated testing solutions that improve testing accuracy and efficiency. What you will learn: - Fundamentals of programming with Java for automation testing - Setting up Selenium WebDriver for browser automation - Writing effective test scripts from scratch - Implementing test automation frameworks - Managing test data and generating reports - Best practices for debugging and maintaining test scripts - Integrating Selenium with other tools like TestNG and Jenkins for continuous integration This course is ideal for beginners in testing and programming, QA professionals, software developers, and IT students in the Middle East who want to gain practical skills in automation testing. No prior experience in Selenium or Java is required, making it accessible for all learners committed to advancing their careers. Why choose this course on our platform: - Industry-relevant content designed by experienced professionals - Flexible online learning with lifetime access to course materials - Interactive sessions and practical exercises to reinforce learning - Certified course recognized by industry employers - Supportive community and expert guidance throughout your training Career opportunities after completing this course include roles such as Automated QA Engineer, Software Tester, Test Automation Developer, and Quality Assurance Analyst. Mastering Selenium with Java opens pathways to higher salaries and increased responsibility within the software testing domain. Upon successful completion, you will receive a professional certificate that validates your expertise in Selenium testing with Java. This certification enhances your profile, making you a competitive candidate in the Middle East tech market and beyond. Enroll now to unlock your potential and take a significant step towards a rewarding career in software testing and automation. SDET QA

Programming Category's Courses

Course Lesson(17)

Lesson 1 : **Headless Browser Testing in Selenium with Java**

Lesson 2 : **How to Check Drop down options are sorted or not in selenium with Java**

Lesson 3 : **How to Handle Authentication Popup in Selenium Web Driver**

Lesson 4 : **Robot Class in Selenium WebDriver Handle Keyboard Events in Selenium**

Lesson 5 : **JavaScriptExecutor in Selenium with Java Execute JavaScript code using Selenium**

Lesson 6 : **How to Encode Password in Selenium using Java Password Encryption in Java**

Lesson 7 : **How to compare Images in Selenium using AShot API Working with AShot API**

Lesson 8 : **How to automate BarCode using ZXing API in Selenium**

Lesson 9 : **How to automate QRCode using ZXing APIÂ in Selenium**

Lesson 10 : **How to Record Selenium Test Execution Video Monte Screen Recorder API**

Lesson 11 : **Extent Report Version 4 Generate Extent Reports in Selenium**

Lesson 12 : **How to Handle Stale Element Exception in Selenium with Java**

Lesson 13 :
XPath Functions and Axes Methods Ancestor Child Parent Preceding Following Self Descendant

Lesson 14 : **How to automate Google search in Selenium with Java**

Lesson 15 : **How to Automate Date Pickers in Selenium using Java**

Lesson 16 : **Part1 How To Generate Allure Reports in Selenium TestNG**

Lesson 17 : **Part2 How To Generate Allure Reports in Selenium TestNG**
