About the course Computer programming fundamentals

Course Presenter : G C Reddy Software Testing

Unlock the foundational principles of Computer Science with this comprehensive online course designed for aspiring programmers and tech enthusiasts in the Middle East and beyond. This training course provides essential knowledge and practical skills to kickstart your journey in computer programming, opening doors to new career opportunities and professional growth. Whether you're looking to enhance your current skill set or begin a new career in technology, this certified course offers the perfect stepping stone to achieve your goals. Throughout this course, you will learn how to write basic code, understand core programming concepts, and develop problem-solving skills that are critical in todayâ€™s digital world. The key topics covered include programming logic, data structures, algorithms, and software development fundamentals. You will also gain insights into best practices in coding and software design, preparing you to take on more advanced programming tasks confidently. This course is ideal for beginners, students, professionals seeking to transition into tech roles, or anyone interested in understanding the basics of computer programming. No prior experience in coding is required, making it accessible for learners at all levels. Why choose this online course on our platform? We offer flexible learning schedules, expert instructors, and a focus on practical skills that are immediately applicable in the workforce. Upon completion, you will receive a professional certificate that validates your new skills, enhancing your resume and boosting your career prospects in the competitive technology sector. Career opportunities following this training include roles such as software developer, web programmer, IT support specialist, and more. This course serves as a solid foundation for further specialization in areas like software engineering, data science, or cybersecurity. Enroll today to gain a recognized certificate, improve your professional skills, and accelerate your career growth in the dynamic field of Computer Science. This certified training course is your gateway to a successful future in technology. G C Reddy Software Testing

Computer Science Category's Courses

Course Lesson(13)

Lesson 1 : **Data Structures in Computer Programming Programming Fundamentals G C Reddy**

Lesson 2 : **Programming Languages vs Scripting Languages**

Lesson 3 : **String handling in Java**

Lesson 4 : **Java Programming Syntax**

Lesson 5 : **Reading User Input in Java**

Lesson 6 : **Usage of Java Programming Concepts for Selenium**

Lesson 7 : **Introduction to Android**

Lesson 8 : **Top Three Programming Languages in 2021**

Lesson 9 : **Applications of Java Uses of Java Purposes of Java G C Reddy Explanation**

Lesson 10 : **Characters in Computer Programming**

Lesson 11 : **Java Interview Questions for Freshers**

Lesson 12 : **Java Programming Fundamentals for Selenium Java warm up video www gcreddy com**

Lesson 13 : **Java Control Flow Statements Programming Fundamentals G C Reddy**
