About the course Selenium basics for beginners

Course Presenter : G C Reddy Software Testing

Discover the fundamentals of Selenium in this comprehensive online training course designed for beginners interested in programming and automation testing. Selenium is a leading tool in the automation testing industry, and mastering its basics can significantly enhance your professional skills and open new career opportunities in the rapidly growing field of software quality assurance. This course provides a solid foundation in Selenium, guiding you through essential concepts and practical implementations. By the end of the training, you will be equipped with the skills necessary to automate web applications effectively and confidently. What you will learn: - Introduction to automation testing and Selenium framework - Setting up Selenium environment and tools - Writing your first automation scripts using Selenium WebDriver - Locating web elements and interacting with web pages - Handling various browser actions and synchronization techniques - Best practices for creating reliable and maintainable test scripts - Overview of advanced features and real-world testing scenarios Who this course is for: - Beginners with no prior experience in programming or automation testing - Software testers aiming to improve their skills with automation tools - IT professionals seeking to advance their career in software quality assurance - Students and professionals interested in gaining a certified course in automation testing Why choose this course on our platform: - Professionally designed curriculum tailored for beginners - Interactive learning experience with practical exercises - Access to expert instructors and ongoing support - Recognized certificate of completion to showcase your skills - Flexible online learning suitable for busy schedules Career opportunities: Completing this Selenium training course can propel your career in software testing, quality assurance, and automation engineering. It opens doors to roles such as Automation Tester, QA Engineer, Selenium Developer, and Test Automation Specialist. As automation continues to dominate the industry, acquiring these skills positions you for long-term success and career growth in the Middle East, Saudi Arabia, UAE, and beyond. Upon successful completion, you will earn a certified course certificate, validating your proficiency in Selenium and automation testing. This credential enhances your professional profile and supports your career advancement in the competitive tech landscape. G C Reddy Software Testing

Programming Category's Courses

Course Lesson(31)

Lesson 1 : **Prerequisites to Learn Selenium**

Lesson 2 : **1 Selenium Tutorial I Introduction 1 Selenium Syllabus**

Lesson 3 : **2 Selenium Tutorial I Introduction 2 An Overview of Selenium**

Lesson 4 : **3 Selenium Tutorial II Java for Selenium 1 Introduction of Java Programming**

Lesson 5 : **4 Selenium Tutorial II Java for Selenium 2 An Overview of Java Programming**

Lesson 6 : **5 Selenium Tutorial II Java for Selenium 3 Java Environment Setup**

Lesson 7 : **6 Selenium Tutorial II Java for Selenium 4 Java Keywords and Identifiers**

Lesson 8 : **7 Selenium Tutorial II Java for Selenium 5 Java Basic Syntax**

Lesson 9 : **8 Selenium Tutorial II Java for Selenium 6 Java Program Structure**

Lesson 10 : **9 Selenium Tutorial II Java for Selenium 7 Comments in Java**

Lesson 11 : **Java Programming for Selenium**

Lesson 12 : **HTML Basics for Selenium**

Lesson 13 : **Selenium Tutorial Software used for Selenium Testing**

Lesson 14 : **What is Selenium Automation Framework**

Lesson 15 : **TestNG Testing Framework for Selenium**

Lesson 16 : **Applications of Java Programming Uses of Java**

Lesson 17 : **String handling in Java**

Lesson 18 : **Java Programming Syntax**

Lesson 19 : **Reading User Input in Java**

Lesson 20 : **Selenium Test Environment Setup Write First Selenium Test Case**

Lesson 21 : **Learning Selenium G C Reddy**

Lesson 22 : **Web Elements HTML Elements Knowledge for Selenium Testers**

Lesson 23 : **Java Abstraction Object Oriented Programming**

Lesson 24 : **Java Encapsulation Object Oriented Programming**

Lesson 25 : **Handling Browser Window using Selenium**

Lesson 26 : **Handling Web Frames using Selenium**

Lesson 27 : **Types of Links in Web Applications**

Lesson 28 : **Handling Web Table or HTML Table using Selenium**

Lesson 29 : **Handling a Checkbox using Selenium**

Lesson 30 : **How do we write Selenium Test cases**

Lesson 31 : **Selenium Batch Test**
