Mindluster Platform

About the course Machine learning with examples step by step

Course Presenter : Trouble Free

Unlock the power of Machine Learning with this comprehensive step-by-step online course designed for learners in the Middle East and beyond. As a vital component of modern Computer Science, machine learning drives innovation across industries such as technology, finance, healthcare, and beyond. This training course offers you a practical, hands-on approach to understanding core concepts and applying them to real-world problems, helping you build professional skills essential for career growth. Throughout this course, you will explore fundamental machine learning techniques, algorithms, and frameworks, all presented through clear examples and detailed explanations. By the end of this program, you will be able to develop, test, and deploy machine learning models confidently, empowering you to take on complex data-driven challenges. What you will learn includes: - Core principles of machine learning and data analysis - Supervised and unsupervised learning techniques - Model evaluation and optimization - Practical implementation using popular programming languages and tools - Real-world case studies demonstrating effective machine learning applications - Best practices for deploying models in production environments This course is ideal for professionals, students, and tech enthusiasts seeking to enhance their skills in computer science and artificial intelligence. Whether you are aiming to advance your current career or transition into data science roles, this training course provides the necessary foundation and advanced insights for success. Why choose this course on our platform? We offer a trusted, professional environment with expert instructors dedicated to your learning journey. Our certified course ensures that you gain recognized qualifications, boosting your resume and opening doors to new career opportunities in the competitive Middle East tech market. Upon completion, you will receive a recognized Certificate of Achievement, validating your expertise in machine learning and positioning you for roles such as data analyst, machine learning engineer, or AI specialist. Enroll today and take a significant step toward mastering one of the most in-demand skills in the digital economy. Trouble Free

Computer Science Category's Courses

Course Lesson(64)

Lesson 1 :
1 Introduction to Machine Learning Definition Example ML machinelearning ml jntu btech

Lesson 2 : **2 Well Posed Learning Problem in Machine Learning with Examples ML**

Lesson 3 : **3 Perspectives and Issues in Machine Learning ML**

Lesson 4 : **4 Designing A Learning System Steps Why we need a Design ML**

Lesson 5 : **6 Choosing a Target Function Step 2 In Designing A Learning System ML**

Lesson 6 : **5 Choosing a Training Experience Step 1 In Designing A Learning System ML**

Lesson 7 :
7 Choosing a Representation for Target Function Step 3 In Designing A Learning System ML

Lesson 8 : **8 Choosing a Learning Algorithm for Approximating the Target Function Step 4 ML**

Lesson 9 : **9 Final Design In Designing A Learning System ML**

Lesson 10 : **10 Concept Learning Introduction Concept Learning As Task ML**

Lesson 11 : **11 Concept Learning As Search With Example ML**

Lesson 12 : **12 Find S Algorithm Finding A Maximally Specific Hypothesis With Example ML**

Lesson 13 : **13 Version Spaces Algorithm to find Version Space With Example ML**

Lesson 14 : **14 Candidate Elimination Algorithm With Example ML**

Lesson 15 :
15 Inductive Bias Remarks On Version Spaces Candidate Elimination Algorithms With Example ML

Lesson 16 :
16 Decision Tree Learning Example and Algorithm Part 1 ML machinelearning ml jntu btech

Lesson 17 : **17 Decision Tree Learning Example and Algorithm Part 2 ML**

Lesson 18 : **18 Decision Tree Learning Example and Algorithm Part 3 ML**

Lesson 19 : **19 Appropriate Problems For Decision Tree Learning ML**

Lesson 20 : **20 Hypothesis Space Search in Decision Tree Learning ML**

Lesson 21 : **22 Issues in Decision Tree Learning ML**

Lesson 22 : **21 Inductive Bias in Decision Tree Learning ML**

Lesson 23 :
23 Introduction to Artificial Neural Networks their Representation of Neural Networks ML

Lesson 24 : **24 Appropriate Problems for Learning Neural Networks ML**

Lesson 25 : **25 The Perceptron and The Perceptron training rule ML**

Lesson 26 : **27 Multi Layer Neural Networks With Diagram ML**

Lesson 27 : **26 Delta Rule The Gradient Descent Algorithm ML**

Lesson 28 : **28 Back Propagation Algorithm With Example Part 1 ML machinelearning ml jntu btech**

Lesson 29 : **29 Back Propagation Algorithm With Example Part 2 ML**

Lesson 30 : **30 Back Propagation Algorithm With Example Part 3 ML**

Lesson 31 : **31 Remarks On Back Propagation Algorithm ML**

Lesson 32 : **32 An Illustrative Example Face Recognition in Neural Networks ML**

Lesson 33 : **33 Advanced Topics in Neural Networks ML**

Lesson 34 : **35 Sample Error and True Error In estimating accuracy of Hypothesis ML**

Lesson 35 : **34 Evaluating The Hypothesis Motivation Estimating Hypothesis Accuracy ML**

Lesson 36 : **36 Basics Of Sampling Theory ML**

Lesson 37 : **37 Difference in Error Of Two Hypothesis Hypothesis Testing Type 1 Type 2 Errors ML**

Lesson 38 : **38 Comparing Learning Algorithms in Machine Learning ML**

Lesson 39 : **39 Bayes Theorem With Proof Example ML**

Lesson 40 : **40 Bayes Theorem Concept Learning ML**

Lesson 41 : **41 Maximum Likelihood Least Squared Error Hypothesis ML**

Lesson 42 : **42 Minimum Description Length Principle ML**

Lesson 43 : **43 Bayes Optimal Classifier with Example Gibs Algorithm ML**

Lesson 44 :
44 Naive Bayes Classifier With Example in Machine Learning ML machinelearning ml jntu btech

Lesson 45 : **45 Bayesian Belief Networks DAG CPT With Example ML**

Lesson 46 : **46 EM Algorithm Expectation Maximisation Steps Usage Advantages Disadvantages ML**

Lesson 47 : **47 Instance Based Learning With Example ML**

Lesson 48 :
48 K Nearest Neighbour Algorithm KNN With Example ML machinelearning ml jntu btech

Lesson 49 : **49 Locally Weighted Regression How to Find Weights Drawbacks ML**

Lesson 50 : **50 Radial Basis Functions with Example ML**

Lesson 51 : **52 Remarks on Lazy and Eager Learning Algorithms ML**

Lesson 52 : **51 Case Based Reasoning with Example ML**

Lesson 53 : **53 Genetic Algorithm Introduction ML**

Lesson 54 : **54 An Illustrative Example Of Genetic Algorithms Selection Crossover Mutation ML**

Lesson 55 : **55 Genetic Programming with Example ML**

Lesson 56 : **56 Models Of Evolution Learning with Example Lamarckian Baldwin Effect ML**

Lesson 57 : **57 Parallel Genetic Algorithm its Types with Example ML**

Lesson 58 : **58 Learning Set Of Rules Sequential Covering Algorithm with Example ML**

Lesson 59 : **59 First Order Learning Rules the FOIL Algorithm ML**

Lesson 60 : **60 Reinforcement Learning Introduction Markovs Decision Problem with Example ML**

Lesson 61 : **61 Q Learning Q Table Q Function Steps Followed with Example ML**

Lesson 62 : **63 Analytical Learning with Example ML**

Lesson 63 : **62 Temporal Difference Learning in Machine Learning ML**

Lesson 64 : **64 Learning With Perfect Domain Theory PROLOG EBG ML**
