About the course Microsoft Azure Active Directory

Microsoft Azure Active Directory Course â€“ In this course, we will learn about Microsoft Azure Active Directory (Azure AD), a cloud-based identity and access management solution that enhances security and streamlines authentication processes. You will explore user and group management, role-based access control (RBAC), conditional access policies, and multi-factor authentication (MFA) to secure enterprise applications and data. The course also covers Azure AD Connect for integrating on-premises directories, single sign-on (SSO) implementation, and identity protection strategies. Additionally, you will gain insights into Azure AD B2B and B2C solutions, managing external identities, and enforcing compliance policies. Whether you are an IT professional, administrator, or security expert, this course will equip you with the skills to configure, manage, and optimize Azure AD for enterprise environments, ensuring seamless access and robust security across cloud applications.
