About the course Python Programming language basics

Course Presenter : Techyance

Unlock the fundamentals of Python programming with this comprehensive online course designed for beginners and aspiring professionals in the Middle East. Python is one of the most versatile and in-demand programming languages, essential for career growth in technology, data analysis, web development, and automation. This training course offers a structured approach to mastering core programming concepts, enabling you to build a strong foundation for your professional skills. Throughout this course, you will learn how to write efficient Python code, understand key programming principles, and apply problem-solving techniques. The curriculum covers essential topics including data types, control structures, functions, modules, and basic data handling. By the end of this training, you'll be equipped with the practical skills needed to develop simple applications and scripts, setting the stage for advanced learning or immediate career opportunities. This course is ideal for beginners with little to no prior programming experience, professionals seeking to expand their technical skills, or students preparing for a future in software development, data science, or automation. If you're looking to enhance your resume with a certified skill and boost your career prospects in the Middle East or globally, this course is the perfect choice. Why choose this professional training course on our platform? Our courses are designed by industry experts, ensuring you receive high-quality content aligned with current market demands. The certified course provides an official recognition of your skills, helping you stand out in a competitive job market and opening doors to new career opportunities. Upon successful completion, you will receive a verified certificate that demonstrates your proficiency in Python programming. This credential can be added to your professional profile, showcasing your commitment to continuous learning and career advancement in the tech industry. Start your journey into programming today with this expert-led online course and take a significant step towards achieving your career growth goals in the Middle East. Techyance

Programming Category's Courses

Course Lesson(13)

Lesson 1 :
Python Programming Language Basic Introduction Installation Tutorial for Beginners Lesson 1

Lesson 2 : **How to Download and Install Python Anaconda and Start Coding Lesson 2**

Lesson 3 : **Popular Python Compilers Interpreters for Online Window Mac Lesson 3**

Lesson 4 : **Jupyter Notebook Tutorial Learn All Options with Installation Process Lesson 4**

Lesson 5 : **How to get Autocomplete Autosuggest in Jupyter Notebook Lesson 5**

Lesson 6 : **Keywords in Python Complete Tutorials List and Definitions**

Lesson 7 : **How to Check Python keywords Keyword List in Jupyter Notebook**

Lesson 8 :
Are Python Keywords Case Sensitive and Lowercase Keyword Count Check Deprecated Keyword List

Lesson 9 :
Identifiers in Python Rules Examples Valid vs Invalid Keywords vs Variables vs Identifiers

Lesson 10 :
Variables in Python Rules Local Vs Global Single Vs Multi Variable Statement Valid Invalid

Lesson 11 : **Python statements Single Line Statement Multiple Line Statement**

Lesson 12 : **id Function in Python with Examples and what it returns identity function**

Lesson 13 : **Check Difference between Identifier and Variable with Examples Python**
