About the course Python programming for beginners

Course Presenter : Derrick Sherrill

Unlock the fundamentals of programming with our comprehensive Python Programming for Beginners online course. Designed for aspiring developers and professionals seeking to enhance their technical skills, this training course offers a solid foundation in one of the most popular programming languages today. Whether you're looking to start a new career in tech or improve your existing skill set, this certified course provides the knowledge and confidence needed to excel in the digital economy. Throughout this course, you will learn essential programming concepts including variables, data types, control structures, functions, and basic data handling. Our practical approach ensures you gain hands-on experience through real-world projects and exercises, preparing you for immediate application in professional environments. By the end of the course, you will be equipped with the skills to develop simple applications and automate tasks with Python. This course is ideal for beginners without prior coding experience, students, professionals seeking career growth, and anyone interested in programming fundamentals. It is suitable for individuals in the Middle East, including Saudi Arabia and the UAE, who want to gain a competitive edge in the technology sector. Why choose this course on our platform? We offer expert-led training with a focus on practical skills that are highly valued in todayâ€™s job market. Our flexible online format allows you to learn at your own pace, with access to resources and support from experienced instructors. Upon completion, you will receive a professional certificate that validates your new skills and enhances your resume. Career opportunities after completing this Python training course are extensive. You can pursue roles such as software developer, data analyst, automation specialist, or proceed to more advanced programming courses. This certification serves as a stepping stone toward a successful career in technology and programming. Enroll now to start your journey in programming with a trusted, certified training course that emphasizes learning, certification, and career growth. Gain the skills needed to succeed in the competitive digital landscape and open new doors to professional success. Derrick Sherrill

Programming Category's Courses

Course Lesson(13)

Lesson 1 : **Watch BEFORE learning Python Code Object oriented Modularity WHY**

Lesson 2 : **Learn Python 2 Syntax Commenting**

Lesson 3 : **Learn Python 3 Variables Data Types**

Lesson 4 : **Learn Python 4 Composite Data Types**

Lesson 5 : **Learn Python 5 Strings**

Lesson 6 : **Learn Python 6 Numbers**

Lesson 7 : **Learn Python 7 Lists**

Lesson 8 : **Learn Python 8 Tuples**

Lesson 9 : **Learn Python 9 Sets**

Lesson 10 : **Learn Python 10 Dictionaries**

Lesson 11 : **Learn Python 11 If Statements**

Lesson 12 : **Learn Python 12 While Loops**

Lesson 13 : **Learn Python 13 For Loops**
