Mindluster Platform

About the course Solar terrestrial physics fundamentals

Course Presenter : IIT Roorkee July 2018

Discover the fascinating world of solar terrestrial physics with this comprehensive online course designed for science enthusiasts and professionals seeking to deepen their understanding of Earth's interaction with solar activity. This training course provides essential knowledge on how solar phenomena influence our planet's magnetosphere, atmosphere, and climate, equipping learners with the scientific skills necessary for advanced research and practical applications in the field. Throughout this course, you will learn to analyze solar activity and its effects on Earth's environment, understand the fundamental principles of space weather, and explore the latest scientific methodologies used in solar-terrestrial studies. The course covers key topics such as solar radiation, geomagnetic storms, auroras, and the impact of solar cycles on Earth's climate systems. This course is ideal for students, scientists, environmental specialists, and professionals in the Middle East and beyond who are passionate about space science, atmospheric physics, and climate studies. Whether you aim to enhance your scientific expertise or advance your career in space research or environmental science, this program offers valuable insights and practical skills. Choosing this course on our platform guarantees access to expert-led training, flexible online learning, and a certified course that enhances your professional profile. Our structured curriculum ensures you gain relevant knowledge that can be directly applied to scientific research, environmental monitoring, and technological innovation. Completing this training course opens up career opportunities in space agencies, environmental consultancies, research institutions, and educational organizations. It also provides a competitive edge in the job market by demonstrating your specialized understanding of solar terrestrial physics. Upon successful completion, you will receive a professional certification recognized within the scientific and research communities. Enroll today to advance your scientific knowledge, earn a valuable certificate, and accelerate your career growth in the dynamic field of solar-terrestrial physics. IIT Roorkee July 2018

Science Category's Courses

Course Lesson(62)

Lesson 1 : **Lecture 04 Sun Interplanetary Space II Prof M V Sunil Krishna IIT Roorkee**

Lesson 2 : **Lecture 03 Sun Interplanetary Space Prof M V Sunil Krishna IIT Roorkee**

Lesson 3 : **Lecture 01 An Introduction Prof M V Sunil Krishna IIT Roorkee**

Lesson 4 : **Solar Terrestrial Physics Promo Video Prof MV Sunil Krishna IIT Roorkee**

Lesson 5 : **Lecture 02 Solar Terrestrial Radiation Prof M V Sunil Krishna IIT Roorkee**

Lesson 6 : **Lecture 05 Sun Interplanetary Space III Prof M V Sunil Krishna IIT Roorkee**

Lesson 7 : **Lecture 06 Sun Solar Activity I Prof M V Sunil Krishna IIT Roorkee**

Lesson 8 : **Lecture 07 Sun Solar Activity II Prof M V Sunil Krishna IIT Roorkee**

Lesson 9 : **Lecture 08 Sun Solar Activity III Prof M V Sunil Krishna IIT Roorkee**

Lesson 10 : **Lecture 09 Plasma Properties of Geospace I Prof M V Sunil Krishna IIT Roorkee**

Lesson 11 : **Lecture 10 Plasma Properties of Geospace II Prof M V Sunil Krishna IIT Roorkee**

Lesson 12 : **Lecture 11 Plasma Properties in Geospace III Prof M V Sunil Krishna IIT Roorkee**

Lesson 13 : **Lecture 12 Plasma Properties in Geospace IV Prof M V Sunil Krishna IIT Roorkee**

Lesson 14 : **Lecture 13 Plasma Properties in Geospace V Prof M V Sunil Krishna IIT Roorkee**

Lesson 15 : **Lecture 14 Fluid theory of plasma I Prof M V Sunil Krishna IIT Roorkee**

Lesson 16 : **Lecture 15 Fluid Theory of Plasma II Prof M V Sunil Krishna IIT Roorkee**

Lesson 17 : **Lecture 16 Fluid Theory of Plasma II Prof M V Sunil Krishna IIT Roorkee**

Lesson 18 : **Lecture 17 Governing Equations I Prof M V Sunil Krishna IIT Roorkee**

Lesson 19 : **Lecture 18 Governing Equations â€“ II Prof M V Sunil Krishna IIT Roorkee**

Lesson 20 : **Lecture 19 MHD Approximation I Prof M V Sunil Krishna IIT Roorkee**

Lesson 21 : **Lecture 20 MHD Approximation II Prof M V Sunil Krishna IIT Roorkee**

Lesson 22 : **Lecture 22 Magneto Plasma II Prof M V Sunil Krishna IIT Roorkee**

Lesson 23 : **Lecture 23 Planetary Magnetic Fields Prof M V Sunil Krishna IIT Roorkee**

Lesson 24 : **Lecture 24 Earth s Magnetosphere I Prof M V Sunil Krishna IIT Roorkee**

Lesson 25 : **Lecture 21 Magneto Plasma I Prof M V Sunil Krishna IIT Roorkee**

Lesson 26 : **Lecture 25 Earth s Magnetosphere II Prof M V Sunil Krishna IIT Roorkee**

Lesson 27 : **Lecture 26 Aurora Airglow I Prof M V Sunil Krishna IIT Roorkee**

Lesson 28 : **Lecture 27 Aurora Airglow II Prof M V Sunil Krishna IIT Roorkee**

Lesson 29 :
Lec 28 Airglow Emissions Introduction to Space Weather Prof M V Sunil Krishna IIT Roorkee

Lesson 30 : **Lecture 29 Introduction to Space Weather I Prof M V Sunil Krishna IIT Roorkee**

Lesson 31 : **Lecture 30 Introduction to Space Weather II Prof M V Sunil Krishna IIT Roorkee**

Lesson 32 : **Lecture 31 Ionosphere I**

Lesson 33 : **Lecture 32 Ionosphere II**

Lesson 34 : **Lecture 33 Ionosphere III**

Lesson 35 : **Lecture 34 Ionosphere IV**

Lesson 36 : **Lecture 35 Ionosphere Structures Photochemistry**

Lesson 37 :
Lecture 36 Ionosphere Structures and Photochemisrty Prof M V Sunil Krishna IIT Roorkee

Lesson 38 : **Lecture 37 Ionospheric Layers Prof M V Sunil Krishna IIT Roorkee**

Lesson 39 : **Lecture 38 Chapman s Layer 1 Prof M V Sunil Krishna IIT Roorkee**

Lesson 40 : **Lecture 39 Chapman s Layer 2 Prof M V Sunil Krishna IIT Roorkee**

Lesson 41 : **Lecture 40 Chapman s Layer 3 Prof M V Sunil Krishna IIT Roorkee**

Lesson 42 :
Lecture 41 Ionospheric Peak Chapman Layer and Inferences I Prof M V Sunil Krishna IIT Roorkee

Lesson 43 :
Lecture 42 Ionospheric Peak Chapman Layer and Inferences II Prof M V Sunil Krishna IIT Roorkee

Lesson 44 :
Lecture 43 Diffusion and Vertical Transport in Ionosphere Prof M V Sunil Krishna IIT Roorkee

Lesson 45 : **Lecture 44 Vertical Transport in Ionosphere I Prof M V Sunil Krishna IIT Roorkee**

Lesson 46 : **Lecture 45 Vertical Transport in Ionosphere II Prof M V Sunil Krishna IIT Roorkee**

Lesson 47 : **Lecture 46 F Region Production Recombination Prof M V Sunil Krishna IIT Roorkee**

Lesson 48 : **Lecture 47 Ionospheric F2 layer Prof M V Sunil Krishna IIT Roorkee**

Lesson 49 : **Lecture 48 Ionospheric F2 layer Protonosphere Prof M V Sunil Krishna IIT Roorkee**

Lesson 50 :
Lecture 49 Diffusion in the presence of magnetic field I Prof M V Sunil Krishna IIT Roorkee

Lesson 51 :
Lec 50 Diffusion in the presence of magnetic field II Prof M V Sunil Krishna IIT Roorkee

Lesson 52 : **Lecture 51 Ionospheric Conductivity I Prof M V Sunil Krishna IIT Roorkee**

Lesson 53 : **Lecture 52 Ionospheric Conductivity II Prof M V Sunil Krishna IIT Roorkee**

Lesson 54 : **Lecture 53 Ionospheric Conductivity III Prof M V Sunil Krishna IIT Roorkee**

Lesson 55 :
Lec 54 Ionospheric Conductivity Collision Gyro Frequencies Prof M V Sunil Krishna IIT Roorkee

Lesson 56 :
Lecture 55 Equatorial Ionosphere Ionospheric Dynamo Prof M V Sunil Krishna IIT Roorkee

Lesson 57 :
Lecture 56 Ionospheric Missions Satellite Observations Prof M V Sunil Krishna IIT Roorkee

Lesson 58 :
Lecture 57 Ionospheric Missions Satellite Observations II Prof M V Sunil Krishna IIT Roorkee

Lesson 59 :
Lecture 58 Ionospheric Missions Satellite Observations III Prof M V Sunil Krishna IIT Roorkee

Lesson 60 : **Lecture 60 Numerical Problems II Prof M V Sunil Krishna IIT Roorkee**

Lesson 61 : **Lecture 59 Numerical Problems I Prof M V Sunil Krishna IIT Roorkee**

Lesson 62 : **Lecture 61 Numerical Problems III Prof M V Sunil Krishna IIT Roorkee**
