About the course EV charging infrastructure fundamentals

Course Presenter : IIT Roorkee July 2018

Discover the essential knowledge of EV charging infrastructure through this comprehensive online course designed for engineering professionals and enthusiasts in the Middle East, including Saudi Arabia and the UAE. As electric vehicle adoption accelerates across the region, understanding the fundamentals of EV charging systems has become crucial for engineering careers and professional development. This training course offers a strategic pathway to enhance your technical expertise, supporting your career growth in the rapidly evolving field of sustainable transportation. In this course, you will learn about the core components of EV charging infrastructure, including different types of chargers, power management, safety standards, and installation practices. You will also explore the latest trends in charging technology, grid integration, and future developments shaping the industry. Our structured curriculum ensures you develop practical skills applicable to real-world projects, making you a valuable asset in the engineering sector. This course is ideal for electrical engineers, infrastructure planners, project managers, and industry professionals aiming to expand their knowledge of EV charging solutions. Whether you are looking to upgrade your skills or start a new career in sustainable infrastructure, this training course provides the necessary foundation for success. Why choose this course on our platform? We offer high-quality content designed by industry experts, flexible online access, and a certified course recognized for its professional credibility. Completing this program will equip you with the skills and knowledge to excel in the modern engineering landscape, particularly within the Middle East's growing electric vehicle market. Upon course completion, you will receive a verified Certificate that enhances your professional profile and demonstrates your expertise in EV charging infrastructure. This certification can open doors to new career opportunities, project roles, and consulting positions in the sustainable transportation industry. Enroll today to gain competitive advantage in the engineering field and contribute to the development of innovative EV charging solutions across the Middle East. IIT Roorkee July 2018

Engineering Category's Courses

Course Lesson(61)

Lesson 1 : **Charging Infrastructure Promo By Prof Apurv Kumar Yadav**

Lesson 2 : **Lec 01 Introduction to the EV Charging System**

Lesson 3 : **Lec 02 Building Blocks of an AC EV Charger**

Lesson 4 : **Lec 03 Building Blocks of a DC EV Charger**

Lesson 5 : **Lec 04 Review of EV Charger Types and Nomenclatures**

Lesson 6 : **Lec 05 Revisiting Diode Bridge Rectifier**

Lesson 7 : **Lec 06 Revisiting Diode Bridge Rectifier II**

Lesson 8 : **Lec 07 Revisiting Diode Bridge Rectifier with Capacitive Filter I**

Lesson 9 : **Lec 08 Revisiting Diode Bridge Rectifier with Capacitive Filter II**

Lesson 10 : **Lec 09 Single phase Boost PFC Converter I**

Lesson 11 : **Lec 10 Single phase Boost PFC Converter II**

Lesson 12 : **Lec 11 Single phase Boost PFC Converter III**

Lesson 13 : **Lec 12 Single phase Boost PFC Converter IV**

Lesson 14 : Lec 13 Closed Loop Control of Single phase Boost PFC Converter

Lesson 15 : Lec 14 Closed Loop Control of Single phase Boost PFC Converter II

Lesson 16 : Lec 15 Closed Loop Control of Single phase Boost PFC Converter III

Lesson 17 : Lec 16 Closed Loop Control of Single phase Boost PFC Converter IV

Lesson 18 : Lec 17 Bridgeless PFC Converter

Lesson 19 : Lec 18 Totem Pole PFC Converter

Lesson 20 : Lec 19 Totem Pole PFC Converter II

Lesson 21 : Lec 20 DCM operation of Boost PFC Converter

Lesson 22 : Lec 21 Flyback Based PFC Converter

Lesson 23 : Lec 22 Pulse Width Modulation

Lesson 24 : Lec 23 Three Phase AC DC Converter

Lesson 25 : Lec 24 Three Phase AC DC Converter II

Lesson 26 : Lec 25 Three Phase AC DC Converter III

Lesson 27 : Lec 26 Closed loop control of three phase AC DC converter I

Lesson 28 : Lec 27 Closed loop control of three phase AC DC converter II

Lesson 29 : Lec 28 Closed loop control of three phase AC DC converter III

Lesson 30 : Lec 29 Closed loop control of three phase AC DC converter IV

Lesson 31 : Lec 30 Revisiting Isolated DC DC converters I

Lesson 32 : Lec 31 Revisiting Isolated DC DC Converters II

Lesson 33 : Lec 32 Revisiting Isolated DC DC Converters III

Lesson 34 : Lec 33 Switching Loss

Lesson 35 : Lec 34 Soft Switching In Half Bridge Configuration

Lesson 36 : Lec 35 Modulation Strategies for PWM Full Bridge Converter

Lesson 37 : Lec 36 Modulation Strategies for PWM Full Bridge Converter II

Lesson 38 : Lec 37 Phase Shifted Full Bridge PSFB Converter I

Lesson 39 : Lec 38 Phase Shifted Full Bridge PSFB Converter II

Lesson 40 : Lec 39 Small Signal Modelling of PSFB I

Lesson 41 : Lec 40 Small Signal Modelling of PSFB II

Lesson 42 : Lec 41 Small Signal Modelling of PSFB III

Lesson 43 : Lec 42 Dual Active Bridge Converter I

Lesson 44 : Lec 43 Dual Active Bridge Converter II

Lesson 45 : Lec 44 Transformer Design for Isolated DC DC Converter I

Lesson 46 : Lec 45 Transformer Design for Isolated DC DC Converter II

Lesson 47 : Lec 46 Transformer Design for Isolated DC DC Converter III

Lesson 48 : **Lec 47 Filter Inductor Design**

Lesson 49 : **Lec 48 AC Type 2 Charging I**

Lesson 50 : **Lec 49 AC Type 2 Charging II**

Lesson 51 : **Lec 50 DC Charging CCS2 I**

Lesson 52 : **Lec 51 DC Charging CCS2 II**

Lesson 53 : **Lec 52 DC Charging CCS2 III**

Lesson 54 : **Lec 53 DC Charging CCS2 IV**

Lesson 55 : **Lec 54 DC Charging CCS2 V**

Lesson 56 : **Lec 55 DC Charging System BEVC DC001 I**

Lesson 57 : **Lec 56 DC Charging System BEVC DC001 II**

Lesson 58 : **Lec 57 DC Charging System BEVC DC001 III**

Lesson 59 : **Lec 58 Charging Stations I**

Lesson 60 : **Lec 59 Charging Stations II**

Lesson 61 : **Lec 60 Charging Stations III**
