Mindluster Platform

About the course Fundamentals of Object Oriented Programming

Course Presenter : IIT Roorkee July 2018

Unlock the fundamental principles of Object Oriented Programming (OOP) through this comprehensive free online programming course. Designed for aspiring developers and IT professionals in the Middle East, this training course offers a valuable opportunity to enhance your technical skills, advance your career, and gain a recognized certificate. Whether you're starting your journey in programming or seeking to deepen your understanding of OOP concepts, this online course provides the essential knowledge needed for success in todayâ€™s competitive tech industry. In this course, you will learn: - The core concepts of Object Oriented Programming, including classes, objects, inheritance, and polymorphism - How to implement OOP principles using popular programming languages such as Java, C++, or Python - Best practices for designing maintainable and scalable software solutions - Techniques for debugging and optimizing object-oriented applications - Practical examples and real-world projects to reinforce your learning This course is ideal for beginners in programming, software developers, computer science students, and IT professionals looking to expand their technical expertise. If you're committed to improving your professional skills and gaining a competitive edge in the job market, this training course is tailored for your growth. Choosing this online platform ensures access to high-quality content, flexible learning schedules, and a professional learning environment. By completing this certified course, you will not only acquire valuable programming skills but also boost your credibility with a recognized certificate, enhancing your career prospects in software development, technology consulting, and related fields. Start your journey toward becoming a proficient software developer today. Enroll now and take a significant step toward your career growth with this professional training course in Object Oriented Programming. IIT Roorkee July 2018

Programming Category's Courses

Course Lesson(61)

Lesson 1 : **Lecture 1 Introduction to Object Oriented Programming**

Lesson 2 : **Fundamentals of Object Oriented Programming by Prof Balasubramanian Raman**

Lesson 3 : **Lecture 2 Introduction to Classes and Objects in C**

Lesson 4 : **Lecture 3 Introduction to Member Data and Member Functions in C**

Lesson 5 : **Lecture 4 Introduction to Classes and Objects in Java**

Lesson 6 : **Lecture 5 Introduction to Paradigms of OOP**

Lesson 7 : **Lecture 6 Classes and Objects in C**

Lesson 8 : **Lecture 7 Classes and Objects in Java and Solved problems**

Lesson 9 : **Lecture 8 Constructors in C Default and Parameterized**

Lesson 10 : **Lecture 9 Constructors in C Copy Constructor**

Lesson 11 : **Lecture 10 Constructors in Java Default and Parameterized**

Lesson 12 : **Lecture 11 Access Specifiers in C**

Lesson 13 : **Lecture 12 Inheritance Single Inheritance**

Lesson 14 : **Lecture 13 Inheritance Multilevel Inheritance**

Lesson 15 : **Lecture 14 Inheritance Multiple Hierarchical and Hybrid**

Lesson 16 : **Lecture 15 Inheritance and Introduction to Friend Function**

Lesson 17 : **Lecture 16 Polymorphism**

Lesson 18 : **Lecture 17 Overloading Operator and Constructor**

Lesson 19 : **Lecture 18 this keyword in C**

Lesson 20 : **Lecture 19 Method Overloading**

Lesson 21 : **Lecture 20 Method Overriding**

Lesson 22 : **Lecture 21 Encapsulation I**

Lesson 23 : **Lecture 22 Encapsulation Il**

Lesson 24 : **Lecture 23 Data Abstraction**

Lesson 25 : **Lecture 24 Virtual Functions in C and Abstract Class**

Lesson 26 : **Lecture 25 Interface in Java**

Lesson 27 : **Lecture 26 Exception Handling in C**

Lesson 28 : **Lecture 27 Exception Handling Solved Problems**

Lesson 29 : **Lecture 28 Multiple Catch and Nested try Statements**

Lesson 30 : **Lecture 29 throws keyword in Java**

Lesson 31 : **Lecture 30 finally keyword in Java**

Lesson 32 : **Lecture 31 Basics of File Handling**

Lesson 33 : **Lecture 32 File Handling Solved Problems**

Lesson 34 : **Lecture 33 File Handling Append and other Mathematical Operations**

Lesson 35 : **Lecture 34 File Handling Character Line and CSV File Reading**

Lesson 36 : **Lecture 35 Serialization and Deserialization**

Lesson 37 : **Lecture 36 Introduction to Templates and Generics**

Lesson 38 : **Lecture 37 Template Class in C**

Lesson 39 : **Lecture 38 Generics in Java**

Lesson 40 : **Lecture 39 Generics in Java contd**

Lesson 41 : **Lecture 40 Generics in Python**

Lesson 42 : **Lecture 41 Introduction to Standard Template Library**

Lesson 43 : **Lecture 42 Associative Containers**

Lesson 44 : **Lecture 43 Unordered Containers Iterators**

Lesson 45 : **Lecture 44 STL Algorithms**

Lesson 46 : **Lecture 45 Case Studies Library Management System Real Time Stock Tracker**

Lesson 47 : **Lecture 46 Design Patterns**

Lesson 48 : **Lecture 47 Singleton and Factory Pattern**

Lesson 49 : **Lecture 48 Factory Pattern in Java**

Lesson 50 : **Lecture 49 Observer Pattern**

Lesson 51 : **Lecture 50 Structural Patterns**

Lesson 52 : **Lecture 51 Advanced Topics Multithreading and Concurrency**

Lesson 53 : **Lecture 52 Deadlocks Causes and Prevention**

Lesson 54 : **Lecture 53 Introduction to Network Programming**

Lesson 55 : **Lecture 54 Communication over HTTP and Related Protocols**

Lesson 56 : **Lecture 55 GUI Development**

Lesson 57 : **Lecture 56 Case Study Mathematical Computation Framework C**

Lesson 58 : **Lecture 57 Case Study Hotel reservation System C**

Lesson 59 : **Lecture 58 Case Study Online Shopping Cart Java**

Lesson 60 : **Lecture 59 Case Study Employee Payroll System Java**

Lesson 61 : **Lecture 60 Case Study Image Classification Tool Python**
