About the course Engineering mechanics

Course Presenter : IIT Roorkee July 2018

Discover the comprehensive world of Engineering Mechanics through this expertly designed online course, tailored for professionals and students seeking to enhance their understanding of fundamental engineering principles. This training course offers a valuable opportunity to develop essential professional skills, boost your career growth, and earn a recognized certificate to validate your expertise in the field of engineering. Throughout this course, you will learn how to analyze and solve real-world engineering problems related to statics, dynamics, and mechanics of materials. The course covers core topics such as force systems, equilibrium, motion, and stress analysis, providing a solid foundation for advanced engineering studies and practical applications. What you will learn includes: - Fundamental concepts of engineering mechanics and their applications - Techniques for analyzing static and dynamic systems - Methods for calculating forces, moments, and stresses - Principles of material behavior under various loads - Application of mechanics in designing safer and more efficient structures This course is ideal for engineering students, aspiring professionals, and industry practitioners in fields such as civil, mechanical, aerospace, and structural engineering. Whether you are looking to strengthen your professional skills or expand your knowledge base, this online course provides flexible learning options suited for busy schedules. Choosing this platform ensures access to high-quality training delivered by industry experts, with a focus on practical skills and real-world relevance. Our certified course guarantees that you receive recognized credentials that can significantly enhance your professional profile and open doors to new career opportunities. Upon completing this training course, you will receive a professional certificate, demonstrating your mastery of engineering mechanics. This certification can serve as a valuable asset for career advancement and increased employability within the Middle East, including Saudi Arabia and UAE, or globally. Invest in your future today by enrolling in this certified online course and take the next step toward becoming a skilled engineering professional. IIT Roorkee July 2018

Engineering Category's Courses

Course Lesson(61)

Lesson 1 : **Mechanics**

Lesson 2 : **Lecture 01 Course outline**

Lesson 3 : **Lecture 02 Vectorial representation of forces and moments**

Lesson 4 : **Lecture 03 Couple moment and reduction of a force system to a force and a couple**

Lesson 5 : **Lecture 04 Examples of couple moment**

Lesson 6 : **Lecture 05 Examples moment in three dimensions**

Lesson 7 : **Lecture 06 Free body diagram and support reactions**

Lesson 8 : **Lecture 07 Equilibrium of rigid bodies in two and three dimensions**

Lesson 9 : **Lecture 08 Examples Equilibrium of rigid bodies in two dimensions**

Lesson 10 : **Lecture 09 Examples Equilibrium of rigid bodies in three dimensions**

Lesson 11 : **Lecture 10 Examples Beams and distributed loads**

Lesson 12 : **Lecture 11 Flexible Cable**

Lesson 13 : **Lecture 12 Flexible Cable Catenary curve**

Lesson 14 : **Lecture 13 Examples Parabolic and Catenary cables**

Lesson 15 : **Lecture 14 Flexible Cable Concentrated load**

Lesson 16 : **Lecture 15 Structures Plane Trusses**

Lesson 17 : **Lecture 16 Analysis of trusses Method of joints**

Lesson 18 : **Lecture 17 Analysis of trusses Method of sections**

Lesson 19 : **Lecture 18 Shear force and bending moment**

Lesson 20 : **Lecture 19 Shear force and bending moment distributed load**

Lesson 21 : **Lecture 20 Principle of virtual work**

Lesson 22 : **Lecture 21 Principle of virtual work examples**

Lesson 23 : **Lecture 22 Principle of virtual work examples II**

Lesson 24 : **Lecture 23 Stable and unstable equilibrium**

Lesson 25 : **Lecture 24 Friction**

Lesson 26 : **Lecture 25 Friction examples**

Lesson 27 : **Lecture 26 Rope and belt friction**

Lesson 28 : **Lecture 27 Rope and belt friction examples**

Lesson 29 : **Lecture 28 Rolling resistance**

Lesson 30 : **Lecture 29 Revision static**

Lesson 31 : **Lecture 30 Coordinate systems Cartesian and planar polar coordinates**

Lesson 32 : **Lecture 31 Coordinate systems spherical coordinates**

Lesson 33 : **Lecture 32 Coordinate systems cylindrical coordinates**

Lesson 34 : **Lecture 33 Cartesian and planar polar coordinates examples**

Lesson 35 : **Lecture 34 Spherical and cylindrical coordinates examples**

Lesson 36 : **Lecture 35 Equation of motion in different coordinate systems**

Lesson 37 : **Lecture 36 Equation of motion examples**

Lesson 38 : **Lecture 37 Work energy method**

Lesson 39 : **Lecture 38 Work energy method examples**

Lesson 40 : **Lecture 39 Impulse momentum relation**

Lesson 41 : **Lecture 40 Variable mass**

Lesson 42 : **Lecture 41 Direct central impact**

Lesson 43 : **Lecture 42 Oblique central impact**

Lesson 44 : **Lecture 43 Moment of inertia**

Lesson 45 : **Lecture 44 Moment of inertia examples**

Lesson 46 : **Lecture 45 Moment of inertia of composite bodies**

Lesson 47 : **Lecture 46 Product of inertia and principal axes of inertia**

Lesson 48 : **Lecture 47 Principal axes of inertia examples I**

Lesson 49 : **Lecture 48 Principal axes of inertia examples II**

Lesson 50 : **Lecture 49 Harmonic oscillator simple harmonic motion**

Lesson 51 : **Lecture 50 Simple harmonic motion examples**

Lesson 52 : **Lecture 51 Damped harmonic oscillator**

Lesson 53 : **Lecture 52 Translation and rotation of rigid bodies**

Lesson 54 : **Lecture 53 Translation and rotation of rigid bodies examples**

Lesson 55 : **Lecture 54 Plane motion of a rigid body**

Lesson 56 : **Lecture 55 Plane motion of a rigid body work energy equation**

Lesson 57 : **Lecture 56 Plane motion of a rigid body impulse momentum equation**

Lesson 58 : **Lecture 57 Three dimensional dynamics of rigid bodies angular momentum**

Lesson 59 : **Lecture 58 Euler s equations of motion**

Lesson 60 : **Lecture 59 Euler s equations of motion examples**

Lesson 61 : **Lecture 60 Revision Dynamics**
