About the course Groundwater engineering fundamentals

Course Presenter : IIT Roorkee July 2018

Unlock the essential concepts of groundwater engineering with this comprehensive online training course designed for aspiring engineers in the Middle East, Saudi Arabia, UAE, and beyond. Groundwater is a vital resource, and mastering its management and engineering principles is crucial for sustainable development and environmental preservation. This certified course offers in-depth knowledge and practical skills to enhance your professional profile and support your career growth in the engineering field. Throughout this training course, you will learn how to assess groundwater sources, design efficient extraction systems, and implement sustainable management practices. The course covers key topics such as aquifer properties, groundwater flow modeling, contamination control, and water resource planning. Our expert instructors ensure that you gain both theoretical understanding and practical insights necessary for real-world engineering challenges. This course is ideal for civil engineers, environmental engineers, water resource managers, and professionals seeking to expand their expertise in groundwater engineering. Whether you are looking to improve your technical skills or advance your career, this online course provides the flexibility to learn at your own pace while gaining a recognized certification. Why choose this course on our platform? We offer high-quality, professionally developed content delivered by industry experts, ensuring you receive training that is both relevant and applicable. Our certification enhances your credibility and can open doors to new career opportunities within the Middle Eastâ€™s growing water management and environmental sectors. Upon completion, you will receive a certified course certificate that validates your expertise in groundwater engineering fundamentals. This credential can boost your professional profile, support career advancement, and demonstrate your commitment to sustainable engineering practices. Enroll today to build a strong foundation in groundwater engineering, enhance your professional skills, and take the next step toward a successful career in environmental and water resource engineering. IIT Roorkee July 2018

Engineering Category's Courses

Course Lesson(63)

Lesson 1 : **Lecture 62 Artificial Recharge Techniques and Designs**

Lesson 2 : **Lecture 61 Groundwater Recharge Methods in India**

Lesson 3 : **Lecture 60 Groundwater Modelling 02**

Lesson 4 : **Lecture 56 Groundwater Exploration 18 Pollution related exploration**

Lesson 5 :
Lecture 54 Groundwater Exploration 16 Selection of types of wells Exploration for Art Rec sites

Lesson 6 : **Lecture 58 Conjunctive use of ground and surface water**

Lesson 7 : **Lecture 57 Groundwater Quality**

Lesson 8 : **Lecture 59 Groundwater Modelling 01**

Lesson 9 : **Lecture 55 Groundwater Exploration 17 Exploration for hot springs**

Lesson 10 : **Lecture 53 Groundwater Exploration 15 Spontaneous potential logging**

Lesson 11 : **Lecture 52 Groundwater Exploration 14 Hydrogeological Well Logging**

Lesson 12 : **Lecture 51 Groundwater Exploration 13 Sampling**

Lesson 13 : **Lecture 29 Field determination of transmissibility and storage coefficient 02**

Lesson 14 : **Lecture 17 Reynolds Number**

Lesson 15 : **Lecture 14 Darcy s Law 01**

Lesson 16 : **Lecture 44 Groundwater Exploration 6**

Lesson 17 : **Lecture 48 Groundwater Exploration 10**

Lesson 18 : **Lecture 50 Groundwater Exploration 12**

Lesson 19 : **Lecture 47 Groundwater Exploration 9**

Lesson 20 : **Lecture 49 Groundwater Exploration 11**

Lesson 21 : **Lecture 46 Groundwater Exploration 8**

Lesson 22 : **Lecture 45 Groundwater Exploration 7**

Lesson 23 : **Lecture 42 Groundwater Exploration 4**

Lesson 24 : **Lecture 41 Groundwater Exploration 3**

Lesson 25 : **Lecture 43 Groundwater Exploration 5**

Lesson 26 : **Lecture 40 Groundwater Exploration 2**

Lesson 27 : **Lecture 39 Groundwater Exploration 1**

Lesson 28 : **Lecture 38 Springs in India 02**

Lesson 29 : **Lecture 36 Springs**

Lesson 30 : **Lecture 37 Springs in India 01**

Lesson 31 : **Lecture 35 Geologic Formations as Aquifers 3**

Lesson 32 : **Lecture 34 Geologic Formations as Aquifers 2**

Lesson 33 : **Lecture 33 Geologic Formations as Aquifers 1**

Lesson 34 : **Lecture 32 Theis Equation Theis Equation Assumptions and Applications 02**

Lesson 35 : **Lecture 31 Theis Equation Theis Equation Assumptions and Applications 01**

Lesson 36 : **Lecture 30 Theis Equation and example of superposition for solution**

Lesson 37 : **Lecture 28 Field determination of transmissibility and storage coefficient 01**

Lesson 38 : **Lecture 27 Jacob Method**

Lesson 39 : **Lecture 26 Nonsteady state steady shape and steady shape conditions**

Lesson 40 : **Lecture 25 Flow nets near aquifer boundaries**

Lesson 41 : **Lecture 24 Aquifer Boundaries**

Lesson 42 : **Lecture 23 Drawdowns in the vicinity of discharging wells**

Lesson 43 : **Lecture 22 Speed of Groundwater Movement**

Lesson 44 : **Lecture 21 Transmissibility**

Lesson 45 : **Lecture 20 Flow to a well**

Lesson 46 : **Lecture 19 Darcy s law applied to aquifers**

Lesson 47 : **Lecture 18 Groundwater Flow and Flow Nets**

Lesson 48 : **Lecture 15 Darcy s Law 02**

Lesson 49 : **Lecture 16 Darcy s Law 03**

Lesson 50 : **Lecture 13 Surface Runoff**

Lesson 51 : **Lecture 12 Permeability**

Lesson 52 : **Lecture 11 Porosity**

Lesson 53 : **Lecture 09 Types of aquifers 02**

Lesson 54 : **Lecture 10 Infiltration and Percolation**

Lesson 55 : **Lecture 08 Types of aquifers 01**

Lesson 56 : **Lecture 07 Water Balance and its Components**

Lesson 57 : **Lecture 06 Surface water vs groundwater**

Lesson 58 : **Lecture 05 Hydrological Cycle 02**

Lesson 59 : **Lecture 04 Hydrological Cycle 01**

Lesson 60 : **Lecture 03 Why to study groundwater**

Lesson 61 : **Lecture 02 Introduction to Groundwater Hydrology 02**

Lesson 62 : **Lecture 01 Introduction to Groundwater Hydrology 01**

Lesson 63 : **Groundwater Engineering**
