About the course Tailwind CSS

What is CSS tailwind? What is Tailwind CSS? According to the official documentation, Tailwind CSS is a utility-first CSS framework for rapidly building custom user interfaces. I like to think of it as a cool way to write inline styling and achieve an awesome interface without writing a single line of your own CSS.Is Tailwind a CSS? Tailwind is a utility-first CSS framework. In contrast to other CSS frameworks like Bootstrap or Materialize CSS it doesn't come with predefined components. Instead Tailwind CSS operates on a lower level and provides you with a set of CSS helper classes.Should you use tailwind CSS? The first benefit of using Tailwind is writing CSS that does not grow linearly. By having utility class names that will be shared between elements, it guarantees a consistent bundle size. Furthermore, Tailwind paired with Purge CSS will remove any unused styles so the codebase will not be bloated with extra classes.Is Tailwind better than bootstrap? Bootstrap is the most popular HTML, CSS, and JS framework for developing responsive, mobile first projects on the web. On the other hand, Tailwind CSS is detailed as "A utility-first CSS framework for rapid UI development". ... It doesn't have a default theme, and there are no build-in UI components.How do you add tailwind to react? Install Tailwind, which comes with a build tool. Add a build step to generate Tailwind's CSS. Import the generated CSS file into our React app. ... Setup a Basic Tailwind + CRA Build Install Tailwind. ... Add Tailwind to the Build. ... Set up the Tailwind source CSS file. ... Import the Generated CSS File.
