About the course React Context Hooks

What is hooks in react? Hooks are the new feature introduced in the React 16.8 version. It allows you to use state and other React features without writing a class. Hooks are the functions which "hook into" React state and lifecycle features from function components. ... Also, it does not replace your knowledge of React concepts.Why we use hooks in react? What are Hooks? â€œHooks are a new addition to React in version 16.8 that allows you use state and other React features, like lifecycle methods, without writing a class.â€ ... Hooks let you always use functions instead of having to constantly switch between functions, classes, higher-order components, and render props.Where do I use react hooks? Always use Hooks at the top level of your React function. By following this rule, you ensure that Hooks are called in the same order each time a component renders. That's what allows React to correctly preserve the state of Hooks between multiple useState and useEffect calls.Do react hooks replace redux? TL;DR The useReducer React hook provides a Redux-like means of managing state transitions, but it's no replacement for Redux when it comes to managing a global application state tree. ... Even better, hooks can be composed into larger units of functionality that can be mixed into any number of components.Should I use react hooks or classes? Hooks can cover all use cases for classes while providing more flexibility in extracting, testing, and reusing code. However one reason that you should still go for Class components over the function components with hooks until Suspense is out for data fetching.Is react hooks the future? React Hooks are a complete and better replacement for Classes. ... Before you say anything, yes, I am aware that React's official documentation states that there are no plans to deprecate class components any time soon, so don't worry, you don't have to go out and re-write your entire code.

Programming Category's Courses

Course Lesson(21)

Lesson 1 : **React Context Hooks Tutorial 1 Introduction**

Lesson 2 : **React Context Hooks Tutorial 2 What is the Context API**

Lesson 3 : **React Context Hooks Tutorial 3 Adding a Context Provider**

Lesson 4 : **React Context Hooks Tutorial 4 Accessing Context part 1**

Lesson 5 : **React Context Hooks Tutorial 5 Accessing Context part 2**

Lesson 6 : **React Context Hooks Tutorial 6 Updating Context Data**

Lesson 7 : **React Context Hooks Tutorial 7 Creating Multiple Contexts**

Lesson 8 : **React Context Hooks Tutorial 8 Consuming Multiple Contexts**

Lesson 9 : **React Context Hooks Tutorial 9 Intro to Hooks**

Lesson 10 : **React Context Hooks Tutorial 10 useState Hook**

Lesson 11 : **React Context Hooks Tutorial 11 useState with Forms**

Lesson 12 : **React Context Hooks Tutorial 12 useEffect Hook**

Lesson 13 : **React Context Hooks Tutorial 13 Hooks with Context**

Lesson 14 : **React Context Hooks Tutorial 14 Multiple Contexts using Hooks**

Lesson 15 : **React Context Hooks Tutorial 15 Creating Context with Functional Components**

Lesson 16 : **React Context Hooks Tutorial 16 Reading List Project part 1**

Lesson 17 : **React Context Hooks Tutorial 17 Reading List App part 2**

Lesson 18 : **React Context Hooks Tutorial 18 Reading List App part 3**

Lesson 19 : **React Context Hooks Tutorial 19 Reducers Actions State**

Lesson 20 : **React Context Hooks Tutorial 20 Adding a Reducer**

Lesson 21 : **React Context Hooks Tutorial 21 Adding Local Storage**
