Mindluster Platform

About the course Docker Kubernetes Containers

Kubernetes is open-source orchestration software that provides an API to control how and where those containers will run. It allows you to run your Docker containers and workloads and helps you to tackle some of the operating complexities when moving to scale multiple containers, deployed across multiple servers.

Programming Category's Courses

Course Lesson(2)

Lesson 1 : **Trying Docker for the First Time Many Learnings**

Lesson 2 : **Trying Kubernetes for the First Time**
