Mindluster Platform

About the course Database Clustering

Database clustering refers to the ability of several servers or instances to connect to a single database. An instance is the collection of memory and processes that interacts with a database, which is the set of physical files that actually store data .

Programming Category's Courses

Course Lesson(11)

Lesson 1 : **Database Clustering Tutorial 1 Intro to Database Clustering**

Lesson 2 : **Database Clustering Tutorial 2 Terminology**

Lesson 3 : **Database Clustering Tutorial 3 Setting up a Database Cluster**

Lesson 4 : **Database Clustering Tutorial 4 Galera Clustering**

Lesson 5 : **Database Clustering Tutorial 5 Setting up Ubuntu Part 1**

Lesson 6 : **Database Clustering Tutorial 6 Setting up Ubuntu Part 2**

Lesson 7 : **Database Clustering Tutorial 7 Passwordless SSH**

Lesson 8 : **Database Clustering Tutorial 8 Installing ClusterControl**

Lesson 9 : **Database Clustering Tutorial 9 Setting up a Cluster in ClusterControl**

Lesson 10 : **Database Clustering Tutorial 10 ProxySQL Load Balancer**

Lesson 11 : **Database Clustering Tutorial 11 ClusterControl Scripting with Developer Studio**
