Mindluster Platform

About the course Julia Data Science

Julia is a high-level and general-purpose language that can be used to write code that is fast to execute and easy to implement for scientific calculations. The language is designed to keep all the needs of scientific researchers and data scientists to optimize the experimentation and design implementation .

Programming Category's Courses

Course Lesson(5)

Lesson 1 : **Intro to JuliaDB a package for working with large persistent data sets**

Lesson 2 : **Intro to Julia DataFrames**

Lesson 3 : **Intro to Julia for data science**

Lesson 4 : **Intro to the Queryverse a Julia data science stack | David Anthoff**

Lesson 5 :
Getting Started | Julia Programming for Data Science | on Julia Academy | with Logan Kilpatrick
