Mindluster Platform

About the course JSON in PHP and JavaScript

JSON is a text-based data format following JavaScript object syntax, which was popularized by Douglas Crockford. Even though it closely resembles JavaScript object literal syntax, it can be used independently from JavaScript, and many programming environments feature the ability to read (parse) and generate JSON .

Programming Category's Courses

Course Lesson(3)

Lesson 1 : **json encode in php with json constants**

Lesson 2 : **access php data in javascript**

Lesson 3 : **access javascript data in php**
