Mindluster Platform

About the course SVG HTML CSS

We can use SVG in CSS via data URI, but without encoding it works only in Webkit based browsers. If encode SVG using encodeURIComponent() it will work everywhere. SVG must have attribute xmlns like this: xmlns='http: //www.w3.org/2000/svg' . If it doesn't exist, it will be added automagically .

Programming Category's Courses

Course Lesson(3)

Lesson 1 : **HTML Chart using SVG CSS PHP tutorial Part1 3**

Lesson 2 : **HTML Chart using SVG CSS PHP tutorial Part2 3**

Lesson 3 : **HTML Chart using SVG CSS PHP tutorial Part3 3**
