Mindluster Platform

About the course enum in Java

Enums are used when we know all possible values at compile-time, such as choices on a menu, rounding modes, command-line flags, etc. It is not necessary that the set of constants in an enum type stay fixed for all time. In Java (from 1.5), enums are represented using enum data type .

Programming Category's Courses

Course Lesson(3)

Lesson 1 : **15 5 enum in Java part 1 | Basics**

Lesson 2 : **15 6 enum in Java part 2 | Switch Working**

Lesson 3 : **15 7 enum in Java part 3 | Enum class**
