Mindluster Platform

# About the course C If Else

The if else in C# statement checks a Boolean expression and executes the code based on if the expression is true or false. The if part of the code executes when the value of the expression is true. The else part of the code is executed when the value of the expression is false .

**Programming Category's Courses**

# Course Lesson(8)

Lesson 1 : **fizz buzz in c**

Lesson 2 : **positive zero or negative in c**

Lesson 3 : **leap year in c**

Lesson 4 : **print times table in c**

Lesson 5 : **numbers ends with digit 3 in c**

Lesson 6 : **print 100 divisible by 7 not multiple of 5 in c**

Lesson 7 : **string number of letters and digits in c**

Lesson 8 : **diagonal matrix in c**
