Mindluster Platform

About the course C Numbers

C# - Data Types. C# is a strongly-typed language. It means we must declare the type of a variable that indicates the kind of values it is going to store, such as integer, float, decimal, text, etc. The following declares and initialized variables of different data types. Example: Variables of Different Data Types.

Programming Category's Courses

Course Lesson(16)

Lesson 1 : **odd numbers with only 3 digit 2 in c**
