Mindluster Platform

About the course Python Numbers

Python has three built-in numeric data types: integers, floating-point numbers, and complex numbers. In this section, you'll learn about integers and floating-point numbers, which are the two most commonly used number types .

Programming Category's Courses

Course Lesson(16)

Lesson 1 : **numbers with all digits odd in python**

Lesson 2 : **numbers starts with digit 3 in python**

Lesson 3 : **number count digit in python**

Lesson 4 : **numbers starts and ends with digit 3 in python**

Lesson 5 : **numbers ends with digit 3 in python**

Lesson 6 : **numbers with only 2 digit 3 in python**

Lesson 7 : **number multiply digits in python**

Lesson 8 : **numbers start and end with same digit in python**

Lesson 9 : **numbers with at least 3 digits 3 in python**

Lesson 10 : **odd numbers with only 3 digit 2 in python**

Lesson 11 : **numbers starts with and has only 1 digit 3 in python**

Lesson 12 : **numbers ends with and has only 1 digit 3 in python**

Lesson 13 : **odd numbers with at least 3 digit 2 in python**

Lesson 14 : **odd numbers with at least 1 digit 2 in python**

Lesson 15 : **numbers with at least 1 digit 3 in python**

Lesson 16 : **min of 3 numbers in python**
