Mindluster Platform

About the course Python Questions

Python is a programming language with objects, modules, threads, and automatic memory management. Its benefits are quite well-known. It is simple and easy to use, portable, extensible, built-in structure, and also, it is open-source .

Programming Category's Courses

Course Lesson(29)

Lesson 1 : **get all files in directory in python**

Lesson 2 : **get all files in directory and sub directories in python**

Lesson 3 : **find all files with extension txt in python**

Lesson 4 : **create directory if not exist in python**

Lesson 5 : **get variable name in python**

Lesson 6 : **copy dictionary and edit copy in python**

Lesson 7 : **dictionary get key with max value in python**

Lesson 8 : **dictionary sort by value in python**

Lesson 9 : **create dictionary from list in python**

Lesson 10 : **create list from dictionary in python**

Lesson 11 : **list of lists to flat list in python**

Lesson 12 : **parse xml in python**

Lesson 13 : **split list into evenly sized chunks in python**

Lesson 14 : **map two lists into dictionary in python**

Lesson 15 : **filter dictionary to contain only certain keys in python**

Lesson 16 : **iterating over dictionaries using for loop in python**

Lesson 17 : **remove duplicates from list preserving order in python**

Lesson 18 : **remove element from list by index in python**

Lesson 19 : **randomly select item from list in python**

Lesson 20 : **combine dictionaries v1 in python**

Lesson 21 : **combine dictionaries v2 in python**

Lesson 22 : **sort dictionary by key v1 in python**

Lesson 23 : **sort dictionary by key v2 in python**

Lesson 24 : **generate all permutations of list in python**

Lesson 25 : **list remove element by index v2 in python**

Lesson 26 : **call function every 5 seconds in python**

Lesson 27 : **Read File Bytes in Python**

Lesson 28 : **string to date in python**

Lesson 29 : **date string is valid in python**
