About the course Cash Receivables Prepaid Expenses

Prepaid expenses is the money set aside for goods or services before you receive delivery. Other current assets are cash and equivalents, accounts receivable, notes receivable, and inventory.Do prepaid expenses convert to cash? Prepaid expenses are initially recorded as assets, but their value is expensed over time onto the income statement. Unlike conventional expenses, the business will receive something of value from the prepaid expense over the course of several accounting periods.Are prepaid expenses Accounts payable? Prepaid expenses refer to advance payments for business expenses, while debts owed by a company in the course of its trade are called accounts payable. Each transaction is completely different from the other, but each has a direct effect on the movement of money into or out of a business.Is prepaid rent accounts receivable? Definition of Rent Receivable Prepaid rent typically represents multiple rent payments, while rent expense is a single rent payment. So, a prepaid account will always be represented on the balance sheet as an asset or a liability. When the prepaid is reduced, the expense is recorded on the income statement.
