Mindluster Platform

About the course VI and VIM

Vi is the universal text editor of Linux. If you know how to use the Vi text editor, you can edit any text file on any mode and version of Linux. Vim is simply an improved version of Vi, but unlike Vi, Vim is not universal. Depending on your Linux distro, it may be or may not be installed by default.

Programming Category's Courses

Course Lesson(21)

Lesson 1 : **Learn VI and VIM the Free Text Editor Intro**

Lesson 2 : **The VI tool**

Lesson 3 : **File Operations**
