Mindluster Platform

About the course Regression in Python

Linear regression performs the task to predict a dependent variable value (y) based on a given independent variable (x). So, this regression technique finds out a linear relationship between x (input) and y(output). Hence, the name is Linear Regression .

Programming Category's Courses

Course Lesson(3)

Lesson 1 : **Learn Linear Regression in Python | Part 1| Eduonix**

Lesson 2 : **Learn Linear Regression with Python | Part 2 | Machine learning | Eduonix**

Lesson 3 : **Learn Linear Regression with Python | Part 3 | Eduonix**
