About the course Quadratic Equation

How do I solve quadratic equations? Solving Quadratic Equations Put all terms on one side of the equal sign, leaving zero on the other side. Factor. Set each factor equal to zero. Solve each of these equations. Check by inserting your answer in the original equation. Image result for Quadratic Equation What is Quadratic Equation? A quadratic equation is an algebraic expression of the second degree in x. The standard form of a quadratic equation is ax2 + bx + c = 0, where a, b are the coefficients, x is the variable, and c is the constant term.
