Mindluster Platform

About the course Hasura GraphQL

GraphQL is designed to make APIs fast, flexible, and developer-friendly. It can even be deployed within an integrated development environment (IDE) known as GraphiQL. As an alternative to REST, GraphQL lets developers construct requests that pull data from multiple data sources in a single API call.

Programming Category's Courses

Course Lesson(5)

Lesson 1 : **Hasura GraphQL 101 Instant GraphQL Postgres API Server with No Code**
