Mindluster Platform

About the course Angular and Python Multilingual App

Angular supports multi-languages natively via angular i18n library, which brings localizing the angular app into different versions of locales. Using this we can translate our app content from one language to another, building versions of the app with different languages for different locales .

Programming Category's Courses

Course Lesson(6)

Lesson 1 : **Flask API Language Translations i18n | Python Multilingual App**

Lesson 2 : **Angular Language Translations i18n using ngx translate Multilingual Angular App**

Lesson 3 : **How this Channel Works**

Lesson 4 : **JWT Authentication Project Introduction**

Lesson 5 : **Microservices Project Introduction**

Lesson 6 : **Announcing ScalableScripts Membership**
