Mindluster Platform

About the course Python OOP in Detail

Object-oriented programming (OOP) is a method of structuring a program by bundling related properties and behaviors into individual objects. In this tutorial, you'll learn the basics of object-oriented programming in Python. Conceptually, objects are like the components of a system.

Programming Category's Courses

Course Lesson(8)

Lesson 1 : **Python Object Oriented Programming | Classes and Objects**

Lesson 2 : **Python Object Oriented Programming | Inheritance**

Lesson 3 : **Python Object Oriented Programming | Multiple Inheritance**

Lesson 4 : **Python Object Oriented Programming | Operator Overloading**

Lesson 5 : **Python Object Oriented Programming | Encapsulation**

Lesson 6 : **Python Object Oriented Programming | Polymorphism**

Lesson 7 : **Python Object Oriented Programming | Decorators**

Lesson 8 : **Python Object Oriented Programming | Property Decorators**
