About the course SKELETON CSS

Skeleton is the brainchild of Dave Gamache. It's a twelve column, fluid grid, with a default max width of 960px, basic typography and minimum styles for common HTML elements such as buttons, links, inputs and textareas. Its strength lies in the fact that it's a light CSS framework .

Programming Category's Courses

Course Lesson(8)

Lesson 1 : **Skeleton CSS Boilerplate Tutorial 1 Installation Setup**
