Mindluster Platform

# About the course Serialize and Deserialize C

Serialization is used to export application data into a file. The destination application then uses deserialization to extract the data from the application for further use. Serialization is a concept in which C# class objects are written or serialized to files.

**Programming Category's Courses**

# Course Lesson(2)

Lesson 1 : **Serialize and Deserialize Json to C Step By Step Tutorial of JSON in C**

Lesson 2 : **Serialize XML C | Deserialize XML C XML Parser C XML to Object C List to XML C**
