# About the course HTML

The HyperText Markup Language, or HTML is the standard markup language for documents designed to be displayed in a web browser. It can be assisted by technologies such as Cascading Style Sheets (CSS) and scripting languages such as JavaScript. Take our HTML Developer Certificate to prove that you have fundamental knowledge of web development using HTML. Get Certified Now! HTML can embed programs written in a scripting language such as JavaScript, which affects the behavior and content of web pages. Inclusion of CSS defines the look and layout of content. The World Wide Web Consortium (W3C), former maintainer of the HTML and current maintainer of the CSS standards, has encouraged the use of CSS over explicit presentational HTML since 1997.[2]

**Programming Category's Courses**

# Course Lesson(10)

Lesson 1 : **What is HTML**

Lesson 2 : **HTML Tag Basics**

Lesson 3 : **HTML Paragraphs**

Lesson 4 : **HTML Ordered and Unordered Lists**

Lesson 5 : **HTML Links**
