About the course Web Design UI UX Fundamentals

What is User Experience (UX)? User Experience design is often inferred to the digital industry as UX for sure. Why not UE? Well, I donâ€™t know! You need to X just sound to the core. At the moment, there seems to be a lot of confusion regarding the difference between UX and UI. Surprisingly, many companies that hire designers donâ€™t even know the difference. This is why I want to tackle after confusing this subject first. User Experience, in my opinion, is the design to be followed, to begin with, the design cycle/process. You know what, every business at its core solves a problem in your customers or users come to you because you're for the best solutions. To understand this problem there are various techniques a UX designer can easily use. This is all a part of the research face and user-centered design process. Now, thereâ€™s no need to worry if you havenâ€™t heard about this problem because I will explain in detail this method during this course in this tutorial/section. All you need is to know, for now, is that there are four-stage cycle designers use for solving actual problems for users to input their needs. The user-centered design process (UCD) helps you to solve problems. Once this initial process is complete, the UI designer now as a deep understanding of the problem users are trying to solve. No design works happen so far just research techniques such as services, customer personas, and many others. Below, I am gonna quickly mention UCD in detail so that the designer ain't face any problem while working on the websites

Graphic Design Category's Courses

Course Lesson(12)

Lesson 1 : **UX UI Course Introduction Outcome**

Lesson 2 : **What is Web Design**

Lesson 3 : **What is UI**

Lesson 4 : **What is UX**

Lesson 5 : **UI UX concept Part 1**

Lesson 6 : **UI UX concept Part 2**

Lesson 7 : **Design Elements**

Lesson 8 : **Design Principles**

Lesson 9 : **User Interface Elements Part 1**

Lesson 10 : **User Interface Elements Part 2**

Lesson 11 : **Color Scheming**

Lesson 12 : **Typography**
