Mindluster Platform

About the course Complexity Algorithms

When we analyse an algorithm, we use a notation to represent its time complexity and that notation is Big O notation. For Example: time complexity for Linear search can be represented as O(n) and O(log n) for Binary search (where, n and log(n) are the number of operations) .

Programming Category's Courses

Course Lesson(189)

Lesson 1 : **Intro to Algorithms Georgia Tech Computability Complexity Theory Algorithms**

Lesson 2 : **Introduction Georgia Tech Computability Complexity Theory Algorithms**

Lesson 3 : **Lesson Plan Georgia Tech Computability Complexity Theory Algorithms**

Lesson 4 : **Optimal Similar Substructure GT Computability Complexity Theory Algorithms**

Lesson 5 : **Edit Distance Problem Georgia Tech Computability Complexity Theory Algorithms**

Lesson 6 : **Sequence Alignment Cost Quiz GT Computability Complexity Theory Algorithms**

Lesson 7 : **Sequence Alignment Cost Solution GT Computability Complexity Theory Algorithms**

Lesson 8 : **Prefix Substructure Georgia Tech Computability Complexity Theory Algorithms**

Lesson 9 : **Sequence Alignment Algorithm GT Computability Complexity Theory Algorithms**

Lesson 10 : **Sequence Alignment Exercise GT Computability Complexity Theory Algorithms**

Lesson 11 : **Sequence Alignment Solution GT Computability Complexity Theory Algorithms**

Lesson 12 : **Sequence Alignment Summary GT Computability Complexity Theory Algorithms**

Lesson 13 : **Chain Matrix Multiplication Georgia Tech Computability Complexity Theory Algorithms**

Lesson 14 : **Subchain Substructure Georgia Tech Computability Complexity Theory Algorithms**

Lesson 15 : **CMM Algorithm Georgia Tech Computability Complexity Theory Algorithms**

Lesson 16 : **CMM Exercise Quiz Georgia Tech Computability Complexity Theory Algorithms**

Lesson 17 : **CMM Exercise Solution Georgia Tech Computability Complexity Theory Algorithms**

Lesson 18 : **CMM Summary Georgia Tech Computability Complexity Theory Algorithms**

Lesson 19 : **All Pairs Shortest Path Georgia Tech Computability Complexity Theory Algorithms**

Lesson 20 : **Shortest Path Substructure GT Computability Complexity Theory Algorithms**

Lesson 21 : **The Floyd Warshall Algorithm GT Computability Complexity Theory Algorithms**

Lesson 22 : **Floyd Warshall Algorithm Exercise GT Computability Complexity Theory Algorithms**

Lesson 23 : **Floyd Warshall Algorithm Georgia Tech Computability Complexity Theory Algorithms**

Lesson 24 : **All Pairs Summary Georgia Tech Computability Complexity Theory Algorithms**

Lesson 25 : **Transitive Closure Georgia Tech Computability Complexity Theory Algorithms**

Lesson 26 : **Dynamic Programming Conclusion GT Computability Complexity Theory Algorithms**

Lesson 27 : **Introduction Georgia Tech Computability Complexity Theory Algorithms**

Lesson 28 : **Prerequisites Georgia Tech Computability Complexity Theory Algorithms**

Lesson 29 : **Convolution Georgia Tech Computability Complexity Theory Algorithms**

Lesson 30 : **Representations of Polynomials GT Computability Complexity Theory Algorithms**

Lesson 31 : **Multiplying Polynomials Georgia Tech Computability Complexity Theory Algorithms**

Lesson 32 : **Multiplication Exercise Quiz GT Computability Complexity Theory Algorithms**

Lesson 33 : **Multiplication Exercise Solution GT Computability Complexity Theory Algorithms**

Lesson 34 : **Multiplying Polynomials Continued GT Computability Complexity Theory Algorithms**

Lesson 35 : **Divide and Conquer Inspiration GT Computability Complexity Theory Algorithms**

Lesson 36 : **Roots of Unity Georgia Tech Computability Complexity Theory Algorithms**

Lesson 37 : **FFT Example Georgia Tech Computability Complexity Theory Algorithms**

Lesson 38 : **FFT Exercise Quiz Georgia Tech Computability Complexity Theory Algorithms**

Lesson 39 : **FFT Exercise Solution Georgia Tech Computability Complexity Theory Algorithms**

Lesson 40 : **FFT Algorithm Georgia Tech Computability Complexity Theory Algorithms**

Lesson 41 : **Butterfly Network Georgia Tech Computability Complexity Theory Algorithms**

Lesson 42 : **Recap of Progress Georgia Tech Computability Complexity Theory Algorithms**

Lesson 43 : **Vandermonde at Roots of Unity GT Computability Complexity Theory Algorithms**

Lesson 44 : **Inverse FFT Georgia Tech Computability Complexity Theory Algorithms**

Lesson 45 : **Inverse FFT Example Georgia Tech Computability Complexity Theory Algorithms**

Lesson 46 : **Inverse FFT Example Solution GT Computability Complexity Theory Algorithms**

Lesson 47 : **Putting it All Together Georgia Tech Computability Complexity Theory Algorithms**

Lesson 48 : **FTT Conclusion Georgia Tech Computability Complexity Theory Algorithms**

Lesson 49 : **Introduction Georgia Tech Computability Complexity Theory Algorithms**

Lesson 50 : **Lesson Plan Georgia Tech Computability Complexity Theory Algorithms**

Lesson 51 : **Flow Networks Georgia Tech Computability Complexity Theory Algorithms**

Lesson 52 : **Fill In the Flow Quiz Georgia Tech Computability Complexity Theory Algorithms**

Lesson 53 : **Fill In the Flow Solution Georgia Tech Computability Complexity Theory Algorithms**

Lesson 54 : **Tricks of the Trade Georgia Tech Computability Complexity Theory Algorithms**

Lesson 55 : **Residual Networks Georgia Tech Computability Complexity Theory Algorithms**

Lesson 56 : **Find the Residual Errors Quiz GT Computability Complexity Theory Algorithms**

Lesson 57 : **Find the Residual Errors Solution GT Computability Complexity Theory Algorithms**

Lesson 58 : **Augmentations Georgia Tech Computability Complexity Theory Algorithms**

Lesson 59 : **The Ford Fulkerson Algorithm GT Computability Complexity Theory Algorithms**

Lesson 60 : **Flows and Cuts Georgia Tech Computability Complexity Theory Algorithms**

Lesson 61 : **Cut Basics Georgia Tech Computability Complexity Theory Algorithms**

Lesson 62 : **Cut Capacity Georgia Tech Computability Complexity Theory Algorithms**

Lesson 63 : **Cut Capacity Calc Quiz Georgia Tech Computability Complexity Theory Algorithms**

Lesson 64 : **Cut Capacity Calc Solution GT Computability Complexity Theory Algorithms**

Lesson 65 : **Cut Capacity Continued Georgia Tech Computability Complexity Theory Algorithms**

Lesson 66 : **The Max Flow Min Cut Theorem GT Computability Complexity Theory Algorithms**

Lesson 67 : **Flows Across the Cut Quiz GT Computability Complexity Theory Algorithms**

Lesson 68 : **Flows Across the Cut Solution GT Computability Complexity Theory Algorithms**

Lesson 69 : **The Max Flow Min Cut Theorem GT Computability Complexity Theory Algorithms**

Lesson 70 : **Bad Augumentations Quiz GT Computability Complexity Theory Algorithms**

Lesson 71 : **Bad Augumentations Solution GT Computability Complexity Theory Algorithms**

Lesson 72 : **Better Augumentations Georgia Tech Computability Complexity Theory Algorithms**

Lesson 73 : **Scaling Algorithm Georgia Tech Computability Complexity Theory Algorithms**

Lesson 74 : **Analysis of Scaling Georgia Tech Computability Complexity Theory Algorithms**

Lesson 75 : **The Edmonds Karp Algorithm GT Computability Complexity Theory Algorithms**

Lesson 76 : **Analysis of Edmonds Karp Georgia Tech Computability Complexity Theory Algorithms**

Lesson 77 : **Dinic s Algorithm Georgia Tech Computability Complexity Theory Algorithms**

Lesson 78 : **Analysis of Dinic s Algorithm GT Computability Complexity Theory Algorithms**

Lesson 79 : **Maximum Flow Conclusion Georgia Tech Computability Complexity Theory Algorithms**

Lesson 80 : **Introduction Georgia Tech Computability Complexity Theory Algorithms**

Lesson 81 : **Bipartite Graphs Georgia Tech Computability Complexity Theory Algorithms**

Lesson 82 : **Bipartite Graph Quiz Georgia Tech Computability Complexity Theory Algorithms**

Lesson 83 : **Bipartite Graph Solution Georgia Tech Computability Complexity Theory Algorithms**

Lesson 84 : **Matching Georgia Tech Computability Complexity Theory Algorithms**

Lesson 85 : **Applications Quiz Georgia Tech Computability Complexity Theory Algorithms**

Lesson 86 : **Applications Quiz Solution Georgia Tech Computability Complexity Theory Algorithms**

Lesson 87 : **Reduction to Max Flow Georgia Tech Computability Complexity Theory Algorithms**

Lesson 88 : **Reduction Correctness Georgia Tech Computability Complexity Theory Algorithms**

Lesson 89 : **Deeper Understanding Georgia Tech Computability Complexity Theory Algorithms**

Lesson 90 : **Augmenting Paths Georgia Tech Computability Complexity Theory Algorithms**

Lesson 91 : **Vertex Cover Georgia Tech Computability Complexity Theory Algorithms**

Lesson 92 : **Find a Min Vertex Cover Quiz GT Computability Complexity Theory Algorithms**

Lesson 93 : **Find a Min Vertex Cover Solution GT Computability Complexity Theory Algorithms**

Lesson 94 : **Max Matching Min Vertex Cover GT Computability Complexity Theory Algorithms**

Lesson 95 : **The Frobenius Hall Theorem GT Computability Complexity Theory Algorithms**

Lesson 96 : **Perfect Matchings Quiz Georgia Tech Computability Complexity Theory Algorithms**

Lesson 97 : **Perfect Matchings Solution GT Computability Complexity Theory Algorithms**

Lesson 98 : **Toward a Better Algorithm GT Computability Complexity Theory Algorithms**

Lesson 99 : **The Hopcroft Karp Algorithm GT Computability Complexity Theory Algorithms**

Lesson 100 : **Matching Differences Quiz GT Computability Complexity Theory Algorithms**

Lesson 101 : **Matching Differences**

Lesson 102 : **Shortest Augmenting Paths GT Computability Complexity Theory Algorithms**

Lesson 103 : **Analysis of a Phase Georgia Tech Computability Complexity Theory Algorithms**

Lesson 104 : **Number of Phases Georgia Tech Computability Complexity Theory Algorithms**

Lesson 105 : **BP Matching Conclusion Georgia Tech Computability Complexity Theory Algorithms**

Lesson 106 : **Introduction Georgia Tech Computability Complexity Theory Algorithms**

Lesson 107 : **Preliminaries Georgia Tech Computability Complexity Theory Algorithms**

Lesson 108 : **HS Linear Programming Georgia Tech Computability Complexity Theory Algorithms**

Lesson 109 : **Workout Plan Quiz Georgia Tech Computability Complexity Theory Algorithms**

Lesson 110 : **Workout Plan Solution Georgia Tech Computability Complexity Theory Algorithms**

Lesson 111 : **To n Dimensions Georgia Tech Computability Complexity Theory Algorithms**

Lesson 112 : **Transformation Quiz Georgia Tech Computability Complexity Theory Algorithms**

Lesson 113 : **Transformation Solution Georgia Tech Computability Complexity Theory Algorithms**

Lesson 114 : **Favored Forms Georgia Tech Computability Complexity Theory Algorithms**

Lesson 115 : **Basic Solutions and Feasibility GT Computability Complexity Theory Algorithms**

Lesson 116 : **Find a Basic Quiz Georgia Tech Computability Complexity Theory Algorithms**

Lesson 117 : **Find a Basic Solution**

Lesson 118 : **Fundamental Theorem of LP GT Computability Complexity Theory Algorithms**

Lesson 119 : **Brute Force Algorithm Quiz GT Computability Complexity Theory Algorithms**

Lesson 120 : **Brute Force Algorithm Solution GT Computability Complexity Theory Algorithms**

Lesson 121 : **Simplex Equations Georgia Tech Computability Complexity Theory Algorithms**

Lesson 122 : **Who Enters the Basis Quiz GT Computability Complexity Theory Algorithms**

Lesson 123 : **Who Enters the Basis Solution GT Computability Complexity Theory Algorithms**

Lesson 124 : **Who Exits the Basis Quiz Georgia Tech Computability Complexity Theory Algorithms**

Lesson 125 : **Who Exits the Basis Solution GT Computability Complexity Theory Algorithms**

Lesson 126 : **Simplex Summary Georgia Tech Computability Complexity Theory Algorithms**

Lesson 127 : **Simplex Example Georgia Tech Computability Complexity Theory Algorithms**

Lesson 128 : **Simplex Correctness Georgia Tech Computability Complexity Theory Algorithms**

Lesson 129 : **Getting Started Georgia Tech Computability Complexity Theory Algorithms**

Lesson 130 : **Conclusion**

Lesson 131 : **Introduction Georgia Tech Computability Complexity Theory Computability**

Lesson 132 : **Bounding an LP Quiz Georgia Tech Computability Complexity Theory Computability**

Lesson 133 :
Bounding an LP Quiz Solution Georgia Tech Computability Complexity Theory Computability

Lesson 134 : **Dual Programs Georgia Tech Computability Complexity Theory Computability**

Lesson 135 : **Duality Theorem Georgia Tech Computability Complexity Theory Computability**

Lesson 136 : **Dual Optimal Solutions Georgia Tech Computability Complexity Theory Computability**

Lesson 137 :
Dual Solution Calculation Quiz Georgia Tech Computability Complexity Theory Computability

Lesson 138 :
Dual Solution Calculation Quiz Georgia Tech Computability Complexity Theory Computability

Lesson 139 : **Duality of Max Matching Georgia Tech Computability Complexity Theory Computability**

Lesson 140 : **Duality of Max Flow Georgia Tech Computability Complexity Theory Computability**

Lesson 141 : **Interpretation of y Quiz Georgia Tech Computability Complexity Theory Computability**

Lesson 142 :
Interpretation of y Quiz Solution Georgia Tech Computability Complexity Theory Computability

Lesson 143 : **Duality Conclusion Georgia Tech Computability Complexity Theory Computability**

Lesson 144 : **Introduction**

Lesson 145 : **Verifying Polynomial Identities**

Lesson 146 : **Discrete Probability Spaces**

Lesson 147 : **Bounding Probabilities**

Lesson 148 : **Bounding Probabilities**

Lesson 149 : **Repeated Trials**

Lesson 150 : **Independence and Conditional Probability**

Lesson 151 : **Bullseyes**

Lesson 152 : **Bullseyes**

Lesson 153 : **Monte Carlo and Las Vegas**

Lesson 154 : **Sampling without Replacement**

Lesson 155 : **Sampling without Replacement**

Lesson 156 : **Random Variables**

Lesson 157 : **Expectation**

Lesson 158 : **Expectation**

Lesson 159 : **Counting Cycles in a Permutation**

Lesson 160 : **Counting Cycles in a Permutation**

Lesson 161 : **Counting Cycles in a Permutation**

Lesson 162 : **Quicksort**

Lesson 163 : **Analysis of Quicksort**

Lesson 164 : **A Minimum Cut Algorithm**

Lesson 165 : **Analysis of Min Cut**

Lesson 166 : **Max 3 SAT**

Lesson 167 : **Approx Max 3 SAT**

Lesson 168 : **PCP Theorem**

Lesson 169 : **Conclusion**

Lesson 170 : **Introduction**

Lesson 171 : **An Approximation for Min Vertex Cover**

Lesson 172 : **C and Cstar**

Lesson 173 : **C and Cstar**

Lesson 174 : **Lower Bounding the Optimum**

Lesson 175 : **Optimization**

Lesson 176 : **Approximation Algorithms**

Lesson 177 : **An Approximation for Maximum Independent Set**

Lesson 178 : **An Approximation for Maximum Independent Set**

Lesson 179 : **An FPTAS for Subset Sum**
