Mindluster Platform

About the course Apache Kafka for Beginners

Apache Kafka is a distributed publish-subscribe messaging system that receives data from disparate source systems and makes the data available to target systems in real time. Kafka is written in Scala and Java and is often associated with real-time event stream processing for big data.

Programming Category's Courses

Course Lesson(2)

Lesson 1 : **Apache Kafka for Beginners 3 hours long**

Lesson 2 : **Installing Apache Kafka on the Mac**
