Mindluster Platform

About the course Search Server with Elasticsearch

You can use the search API to search and aggregate data stored in Elasticsearch data streams or indices. The API's query request body parameter accepts queries written in Query DSL. The following request searches my-index-000001 using a match query. This query matches documents with a user.id value of kimchy .

Programming Category's Courses

Course Lesson(7)

Lesson 1 : **Building a Search Server with Elasticsearch Tutorial Term Suggestions | packtpub com**

Lesson 2 : **Building a Search Server with Elasticsearch Tutorial Highlighting | packtpub com**

Lesson 3 :
Building a Search Server with Elasticsearch Tutorial Application Structure | packtpub com

Lesson 4 : **Building a Search Server with Elasticsearch Tutorial Basic Query Types | packtpub com**

Lesson 5 :
Building a Search Server with Elasticsearch Tutorial Ingesting the Initial Document | packtpub com

Lesson 6 : **Building a Search Server with Elasticsearch Tutorial Course Objectives | packtpub com**

Lesson 7 : **Building a Search Server with Elasticsearch Tutorial Relevancy Tuning | packtpub com**
