Mindluster Platform

About the course Julia for Data Science

Julia is a high-level and general-purpose language that can be used to write code that is fast to execute and easy to implement for scientific calculations. The language is designed to keep all the needs of scientific researchers and data scientists to optimize the experimentation and design implementation .

Programming Category's Courses

Course Lesson(5)

Lesson 1 : **Julia for Data Science The Course Overview | packtpub com**

Lesson 2 : **Julia for Data Science Using Types and Parameterized Methods | packtpub com**

Lesson 3 : **Julia for Data Science Reading and Writing Data Files and Julia Data | packtpub com**

Lesson 4 :
Julia for Data Science Exploring and Understanding a Dataset Statistically | packtpub com

Lesson 5 : **Julia for Data Science Basic Machine Learning Techniques | packtpub com**
