Mindluster Platform

About the course Clustering Data with R

Clustering in R refers to the assimilation of the same kind of data in groups or clusters to distinguish one group from the others(gathering of the same type of data). This can be represented in graphical format through R. We use the KMeans model in this process .

Programming Category's Courses

Course Lesson(4)

Lesson 1 : **Classifying and Clustering Data with R The Course Overview | packtpub com**

Lesson 2 : **Classifying and Clustering Data with R Discriminant Analysis with R | packtpub com**

Lesson 3 :
Classifying and Clustering Data with R Time Series Decomposition with R | packtpub com

Lesson 4 : **Classifying and Clustering Data with R Decision Tree with R | packtpub com**
