About the course Angularjs Tutorial for Beginners

Is Angular easy for beginners? The answer to the question- Is angular easy to learn, totally depends on your knowledge and learning of JavaScript. So if you have a basic knowledge of JavaScript, it would be easy for you to sail through. But are not well versed with your basics then indeed learning Angular will be an uneven hilly patch for you. If you have a fairly simple and straightforward application to develop, AngularJS can make development faster and easier. But if you are looking to develop complex applications that must be scalable, Angular should be your obvious choice. AngularJS tutorial provides basic and advanced concepts of AngularJS. Our AngularJS tutorial is designed for beginners and professionals. Angular JS is an open source JavaScript framework by Google to build web applications. It can be freely used, changed and shared by anyone. Our AngularJS tutorial includes all topics of AngularJS such as mvc, expressions, directives, controllers, modules, scopes, filters, dom, forms, ajax, validation, services, animation, dependency injection, views, w3.css etc. There are also given AngularJS interview questions to help you better understand the AngularJS. Angular is a web framework invented by Google, itâ€™s been so long, and angular is evolving day by day, more functionalities are added, enhanced performance and suitable for higher interactivity website, due to this more and more organizations has started adopting angular as their productâ€™s front-end. Angular is being popular amongst other frameworks and libraries, this many big and small companies are demanding Angular as a primary skill along with other backend support which turns its importance on a higher level into the industry How long will it take to learn Angular? Angular is a web framework invented by Google, itâ€™s been so long and angular is evolving day by day, more functionalities are added, enhanced performance and suitable for higher interactivity website, due to this more and more organizations has started adopting angular as their productâ€™s front-end. Angular is being popular amongst other frameworks and libraries, this many big and small companies are demanding Angular as a primary skill along with other backend support which turns its importance on a higher level into the industry. Due to such reasons, many developers are eager to learn this framework so that they can get benefits from their career perspectives. But they may have one question in their mind that Angular is interesting to learn but how can we leaned and how much time it will take? I would say, there is no direct answer to that because the experience of the candidate matters a lot and it may be. Beginner Intermediate Expert So if we follow these experience level, the person should know JavaScript which is must for learning Angular, not just only Angular but there are tons of other frameworks and libraries are built on JavaScript so at last, we can say if you know the basic of JavaScript then you can start learning Angular right away. What to learn? Angular is a large and very comprehensive framework, but you can do a lot with just basic level templates, controllers, data-binding. Routing and so on. If you want to learn Angular 2+ then skip we can skip angularJs, as both are totally different and more importantly Angular is completely re-written over AngularJs. AngularJS is based on pure MVC (model view controller) while angular 2+ is based on the component-based standard. You don't need to know anything about AngularJS, instead, we can start learning Angular 2+ right away. If you are ready to spend at least 2-3 hours daily on learning Angular then around 2-3 months are sufficient. To grasp angular, we should know its core concepts first and few of them are listed below. Component Directive Data bindings Routing Dependency injection Deployment Module Forms Observables and RxJs Bootstrapping Animations So above are the few core concepts that we need to learn, for that you should try the official angular.io documentation, and the great thing about that docs is they have detailed explanation along with a suitable example in a form of runnable application which you can try your own while learning.>Below is the home page of angular.io documentation to get started with Angular.

Programming Category's Courses

Course Lesson(12)

Lesson 1 : **Angularjs Tutorial for Beginners learn Angular js using UI Router**

Lesson 2 : **AngularJS Directives Tutorial Part 1 Demystifying Angular Directives**

Lesson 3 : **Rapid E Commerce with Angular and Moltin Easy Fast E Commerce Development**

Lesson 4 : **What is Node js Exactly a beginners introduction to Nodejs**

Lesson 5 : **Node js tutorial for beginners 2014 an introduction to Node js with Express js**

Lesson 6 : **Node js MongoDB Tutorial using Mongoose**

Lesson 7 : **Nginx Tutorial Proxy to Express Application Load Balancer Static Cache Files**

Lesson 8 : **How to deploy node js applications 1 spin up a server**

Lesson 9 : **Deploying node js applications 2 provision server setup flightplan**

Lesson 10 : **Deploying Node js Applications Deploy Node the right way as an Upstart Service**

Lesson 11 : **How to send server email with Node js sendgrid mandrill mailgun etc**

Lesson 12 :
Responsive HTML Email with Node js Send Rich Responsive HTML Emails Using Ink Yeoman Express
