About the course Generative Adversarial Networks

Generative Adversarial Networks, or GANs, are a deep-learning-based generative model. More generally, GANs are a model architecture for training a generative model, and it is most common to use deep learning models in this architecture .

Programming Category's Courses

Course Lesson(4)

Lesson 1 : **Learning Generative Adversarial Networks The Course Overview | packtpub com**

Lesson 2 :
Learning Generative Adversarial Networks Introduction to Conditional GAN| packtpub com

Lesson 3 : **Learning Generative Adversarial Networks Introduction to StackGAN| packtpub com**

Lesson 4 :
Learning Generative Adversarial Networks Builds an Image Correction System by DCGAN| packtpub com
