Mindluster Platform

About the course Building Serverless Applications

You can build a serverless web application by using several AWS services together. Each service is fully managed and does not require you to provision or manage servers. You only need to configure them together and upload your application code to AWS Lambda, a serverless compute service.

Programming Category's Courses

Course Lesson(6)

Lesson 1 : **Building Serverless Applications The Course Overview| packtpub com**

Lesson 2 : **Building Serverless Applications Event Driven Architecture| packtpub com**

Lesson 3 : **Building Serverless Applications Lab Introduction| packtpub com**

Lesson 4 : **Building Serverless Applications NoSQL Principles| packtpub com**

Lesson 5 : **Building Serverless Applications What Are IAM Permissions | packtpub com**

Lesson 6 :
Building Serverless Applications Scheduling an AWS Lambda Using Serverless| packtpub com
