About the course Android RESTful Client Apps

What is Retrofit? Retrofit is a REST Client library (Helper Library) used in Android and Java to create an HTTP request and also to process the HTTP response from a REST API. It was created by Square, you can also use retrofit to receive data structures other than JSON, for example SimpleXML and Jackson .

Programming Category's Courses

Course Lesson(5)

Lesson 1 : **Building Android RESTful Client Apps The Course Overview | packtpub com**

Lesson 2 : **Building Android RESTful Client Apps What Is REST | packtpub com**

Lesson 3 : **Building Android RESTful Client Apps What Is JSON | packtpub com**

Lesson 4 :
Building Android RESTful Client Apps Commons Errors During HTTP Requests | packtpub com

Lesson 5 :
Building Android RESTful Client Apps What Is Clean Code and Why It Is So Important | packtpub com
