Mindluster Platform

About the course Application with Angular 5 and Firebase

We'll be able to create, delete tasks, and transfer them from one category to another using drag and drop. We'll develop the user interface using Angular and use Firestore as our persistent store. At the end of the codelab we'll deploy the app to Firebase Hosting using the Angular CLI.

Programming Category's Courses

Course Lesson(7)

Lesson 1 :
Building a Realtime Chat Application with Angular 5 and Firebase The Course Overview |packtpub com

Lesson 2 :
Building a Realtime Chat Application with Angular 5 and Firebase Creating Login Form|packtpub com

Lesson 3 :
Building a Realtime Chat Application with Angular 5 and Firebase Creating Alert Notifn|packtpub com

Lesson 4 :
Building a Realtime Chat Application with Angular 5 and Firebase Setting Up Firebase|packtpub com

Lesson 5 :
Building a Realtime Chat Application with Angular 5 and Firebase Seeding Chatroom Data|packtpub com
